

CorPower Ocean

CorPower C4 WEC. Wave power. To power the planet.

01A

Equinox

Equinox Ocean Turbines.

A promise of over 700GW stable clean energy

02A

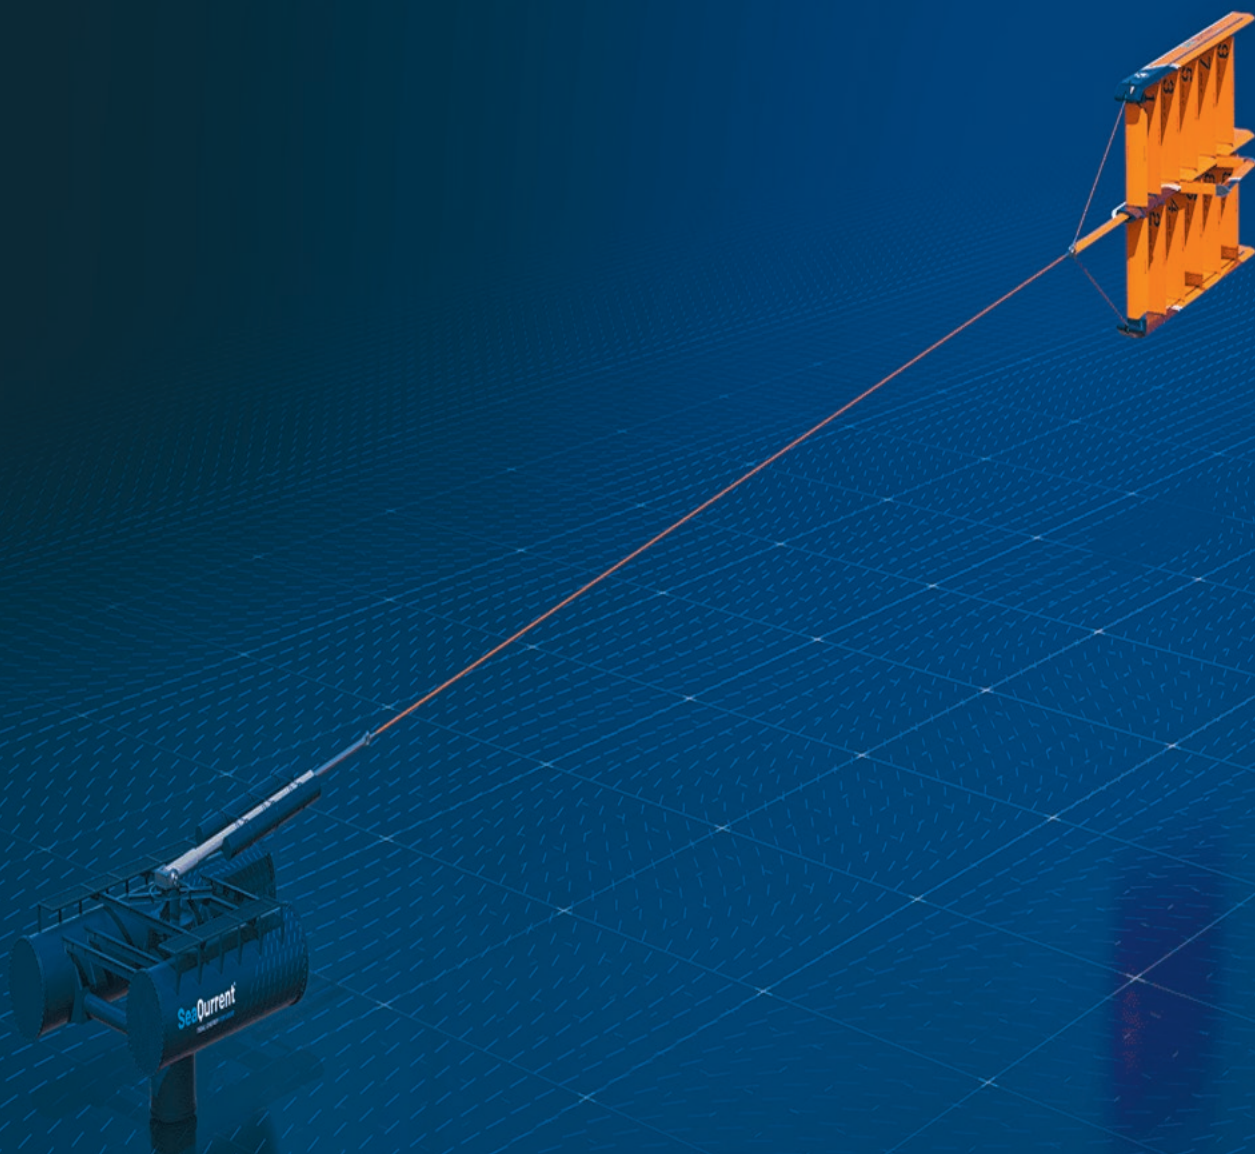

SeaCurrent

TidalKite™ system. Tidal energy. For good.

03A

FiberSail

Fibersail shape sensor. Shaping the structures of tomorrow

04A

InnoEnergy

TBB.

Offshore wind

X1 Wind

X1 Wind. Scalable and cost-effective offshore wind

05A

ACT Blade

ACT Blade. The lightest and most controllable wind turbine blade

06A

Aerones

Robotic wind turbine maintenance and inspection.

Harnessing the power of AI for wind turbine blade inspections

07A

Nabrawind

Nabralift. Self Erecting Tower, a new technology that breaks the barriers to the growth of the wind turbines hub height

08A

RenerCycle

RenerCycle. Developing industrial and technological solutions to boost the circular economy in renewables

09A

Vertequip

S.T.E.P. System of translation and elevation of people

10A

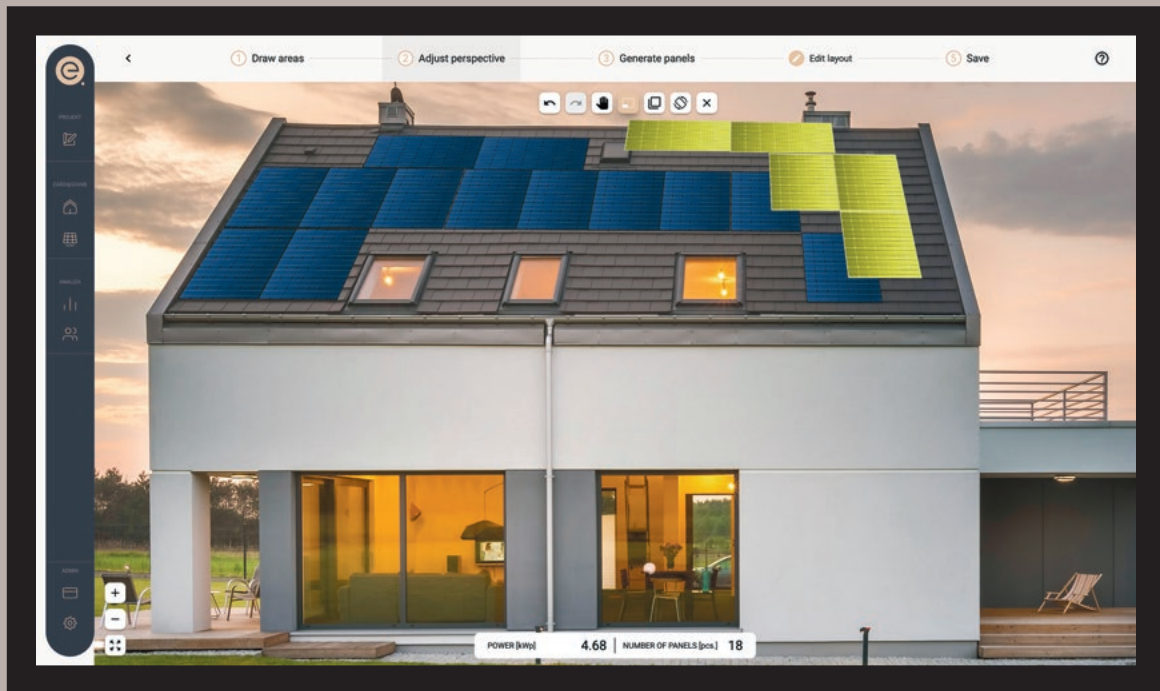

EasySolar

EasySolar. AI-powered solar software for websites and teams

11A

Ecoligo

Solar-as-a-service. Offering affordable solar-as-a-service solutions for commercial and industrial clients in developing countries

12A

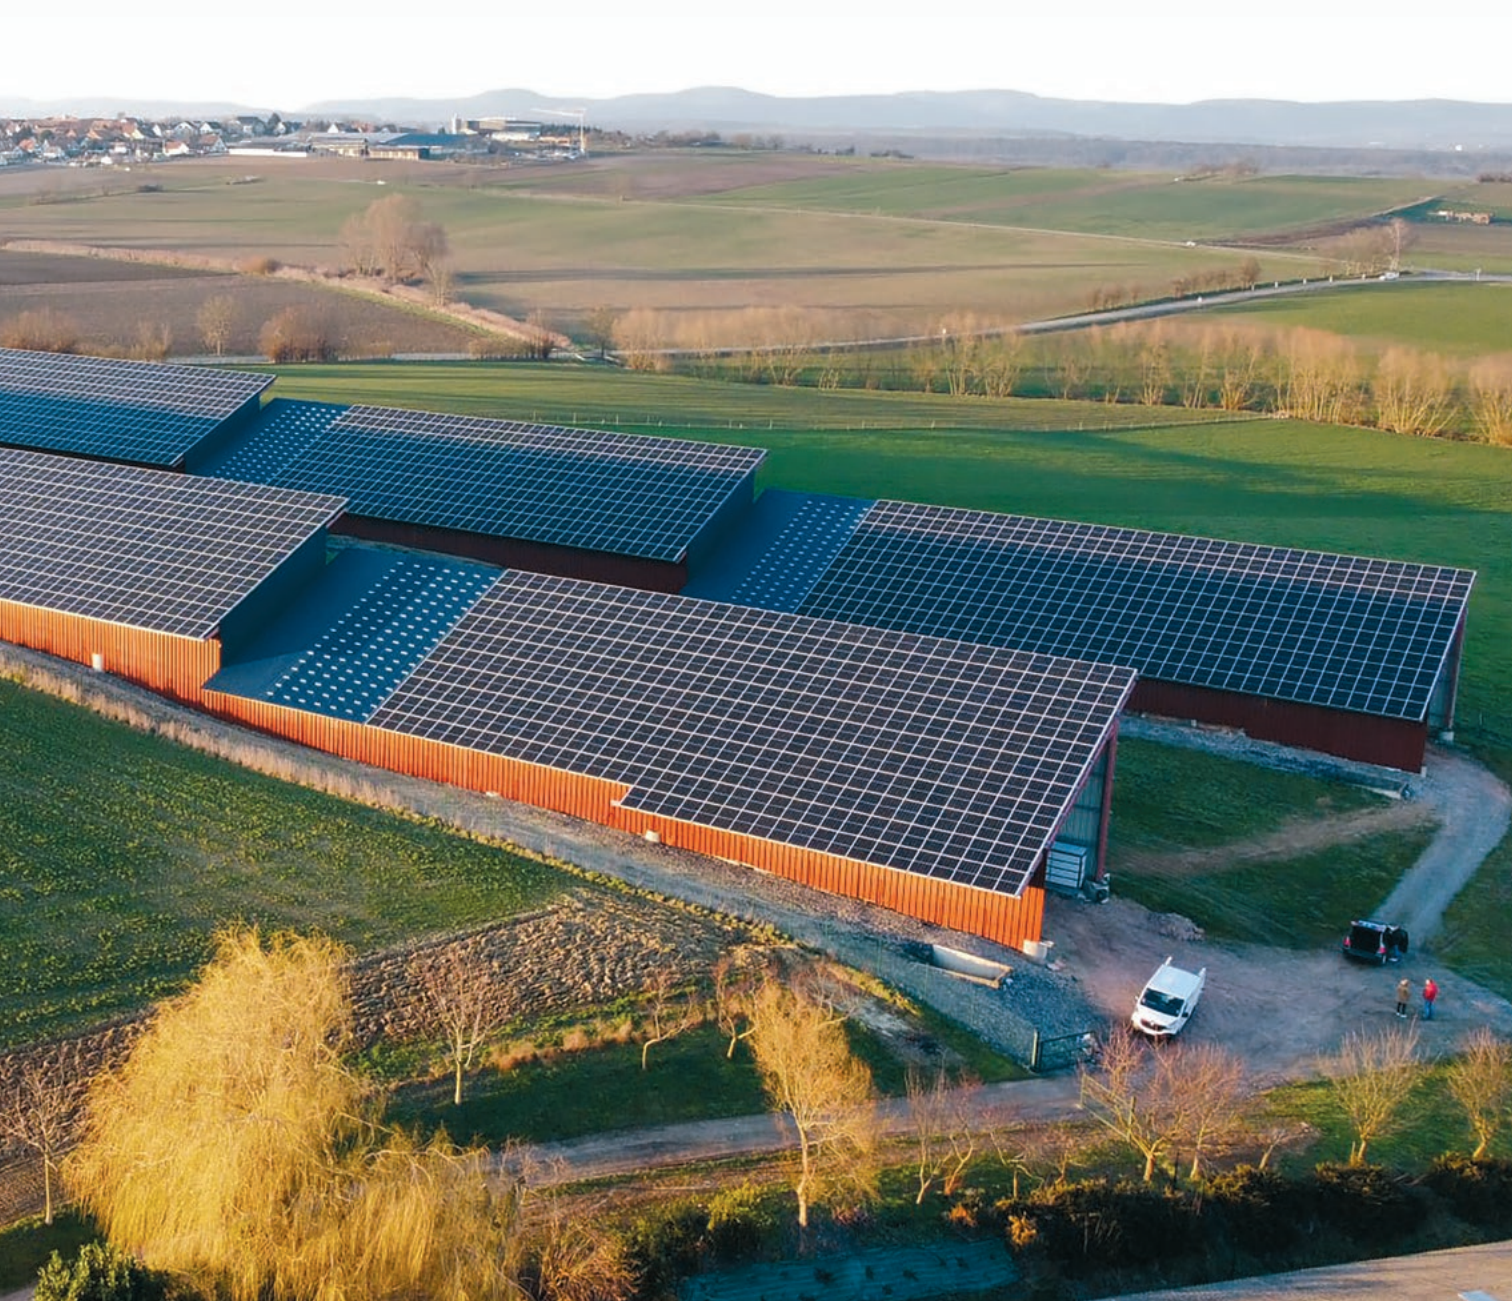

Feedgy

Feedgy. Innovations to make solar plants more profitable for much longer

13A

Future Voltaics

Vecthor. More power when it matters

14A

InnoEnergy

TBB.

HoloSolis

HoloSolis. PV made in Europe, by Europeans for Europeans

15A

Nexwafe

EpiWafers. Green solar wafers to power the energy transition

16A

Nines PV

ADE 6000. Highly efficient water-free gaseous silicon wafer etching for solar cell Gigafactories

17A

Phytonics

Anti-glare coating for PV panels. Multifunctional bionic coating for glare-free and more efficient solar modules

18A

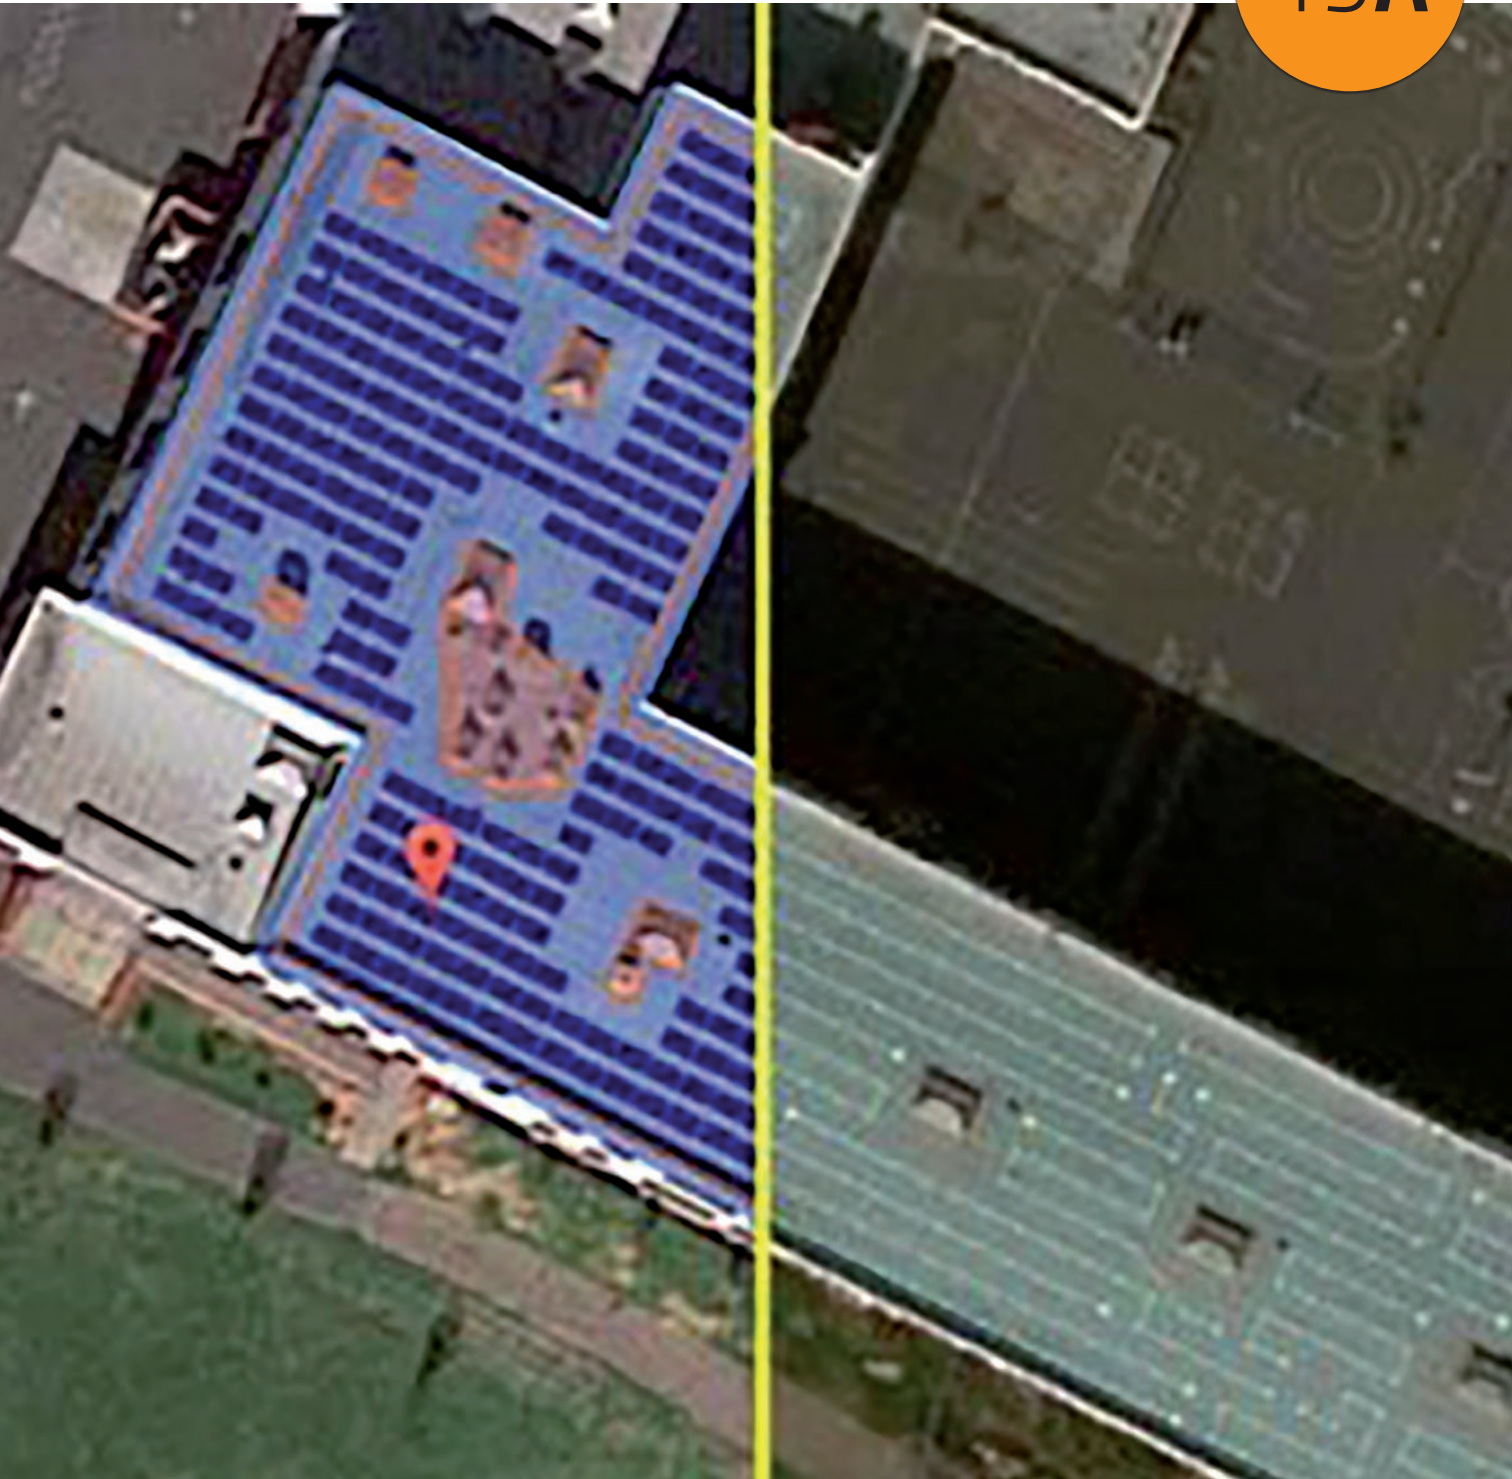

PVComplete

PVCAD and PVSkyetch. Solar design software
from concept to completion

19A

InnoEnergy

TBB.

ROSI

Technology to recycle raw materials. Revalorising silicon from production and product waste to contribute to a circular economy in PV

20A

Solaqua

Solaqua. Solar-powered irrigation system coupled
in DC and without need of storage

21A

Steadysun

SteadyMet. Solar and wind energy forecasting API

22A

Novatron

Novatron. Fusion powering the sustainable planet

23A

C-Green

OxyPower HTC™. Makes wet waste valuable

24A

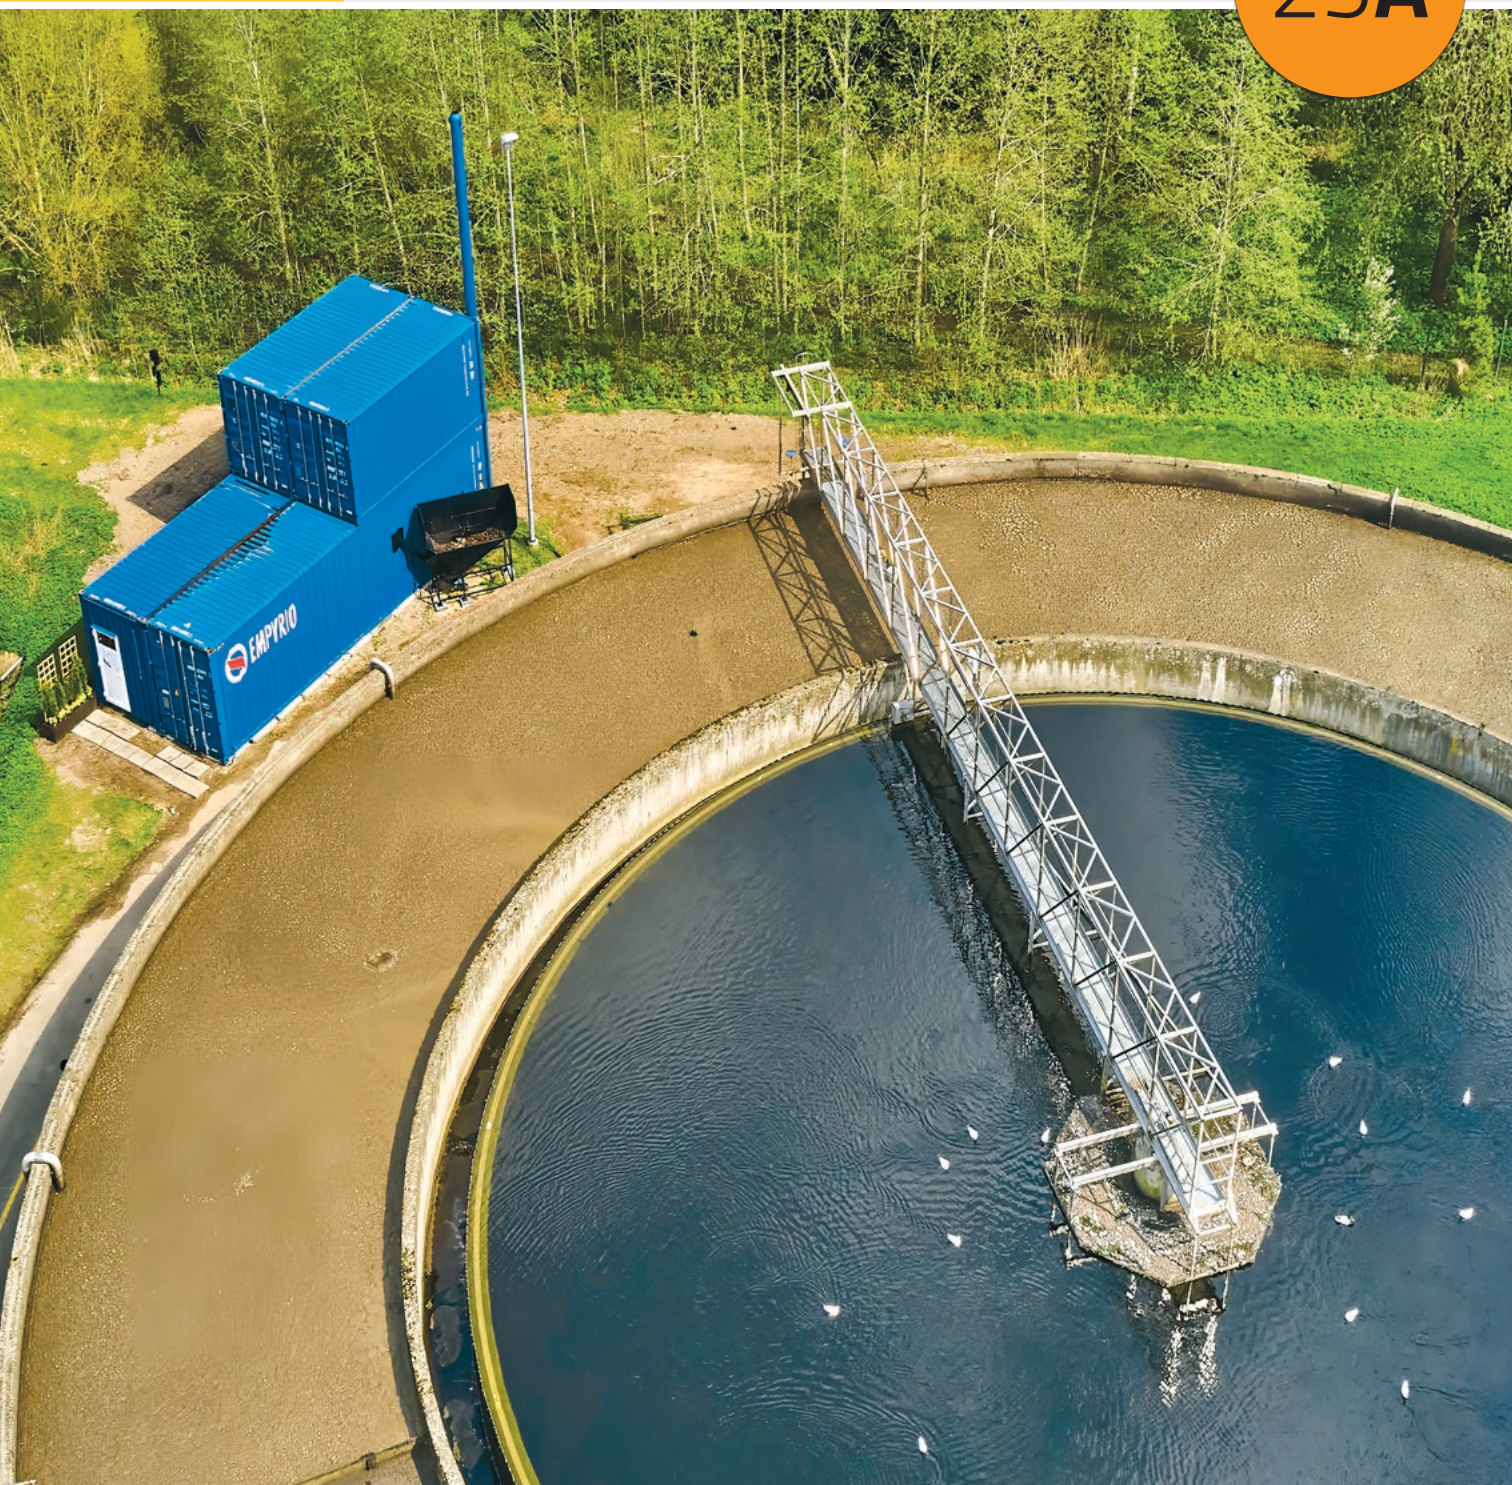

Empyrio

Wastewater sludge utilisation. Cost-effective, compact on-site sewage sludge utilisation solution for small and medium wastewater treatment plants

25A

InnoEnergy

TBB.

Bioenergy & waste to energy

Methaplanet

Methaplanet's Maximizer. Prepare your biomass and increase your biogas production

26A

InnoEnergy

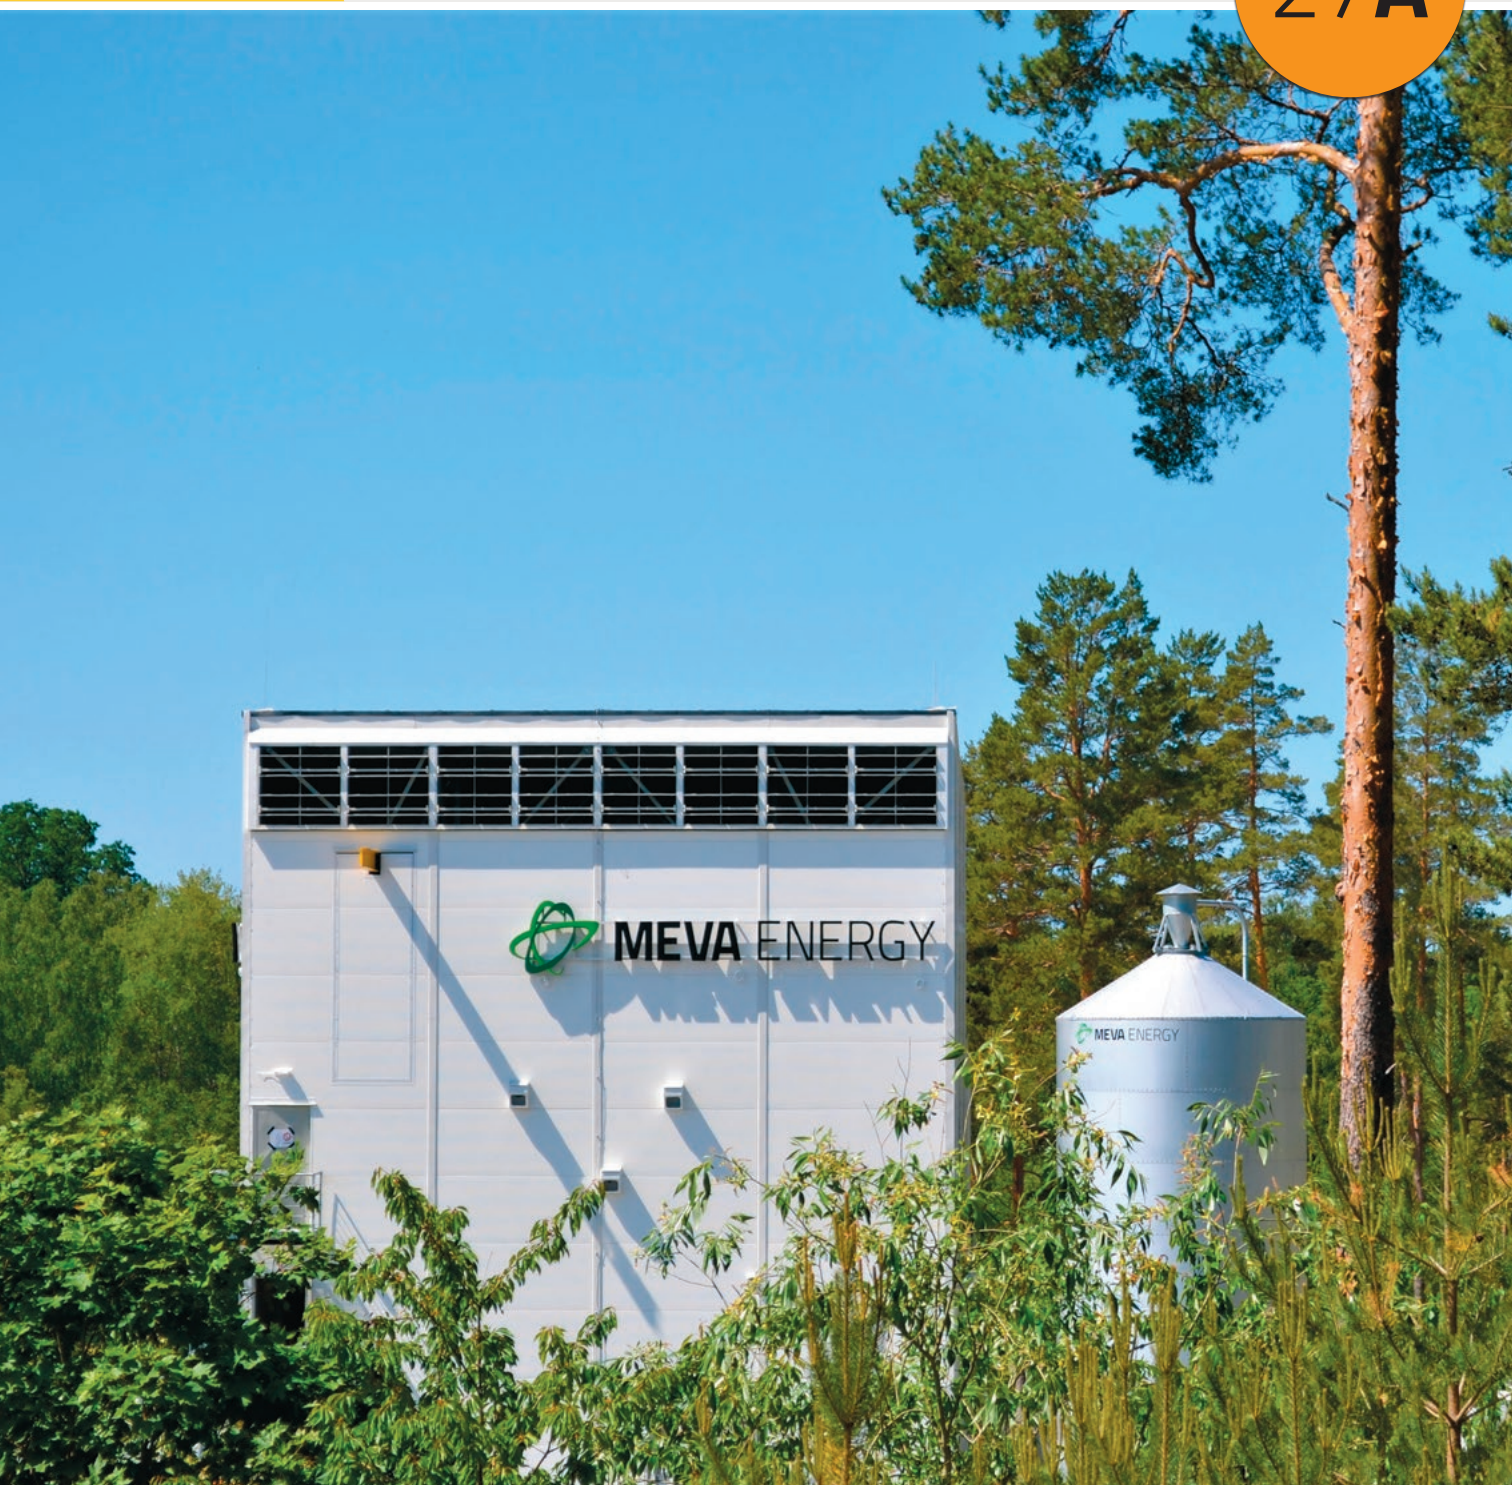

TBB.

Meva Energy

Meva Energy. Making it possible to reach below net-zero

27A

InnoEnergy

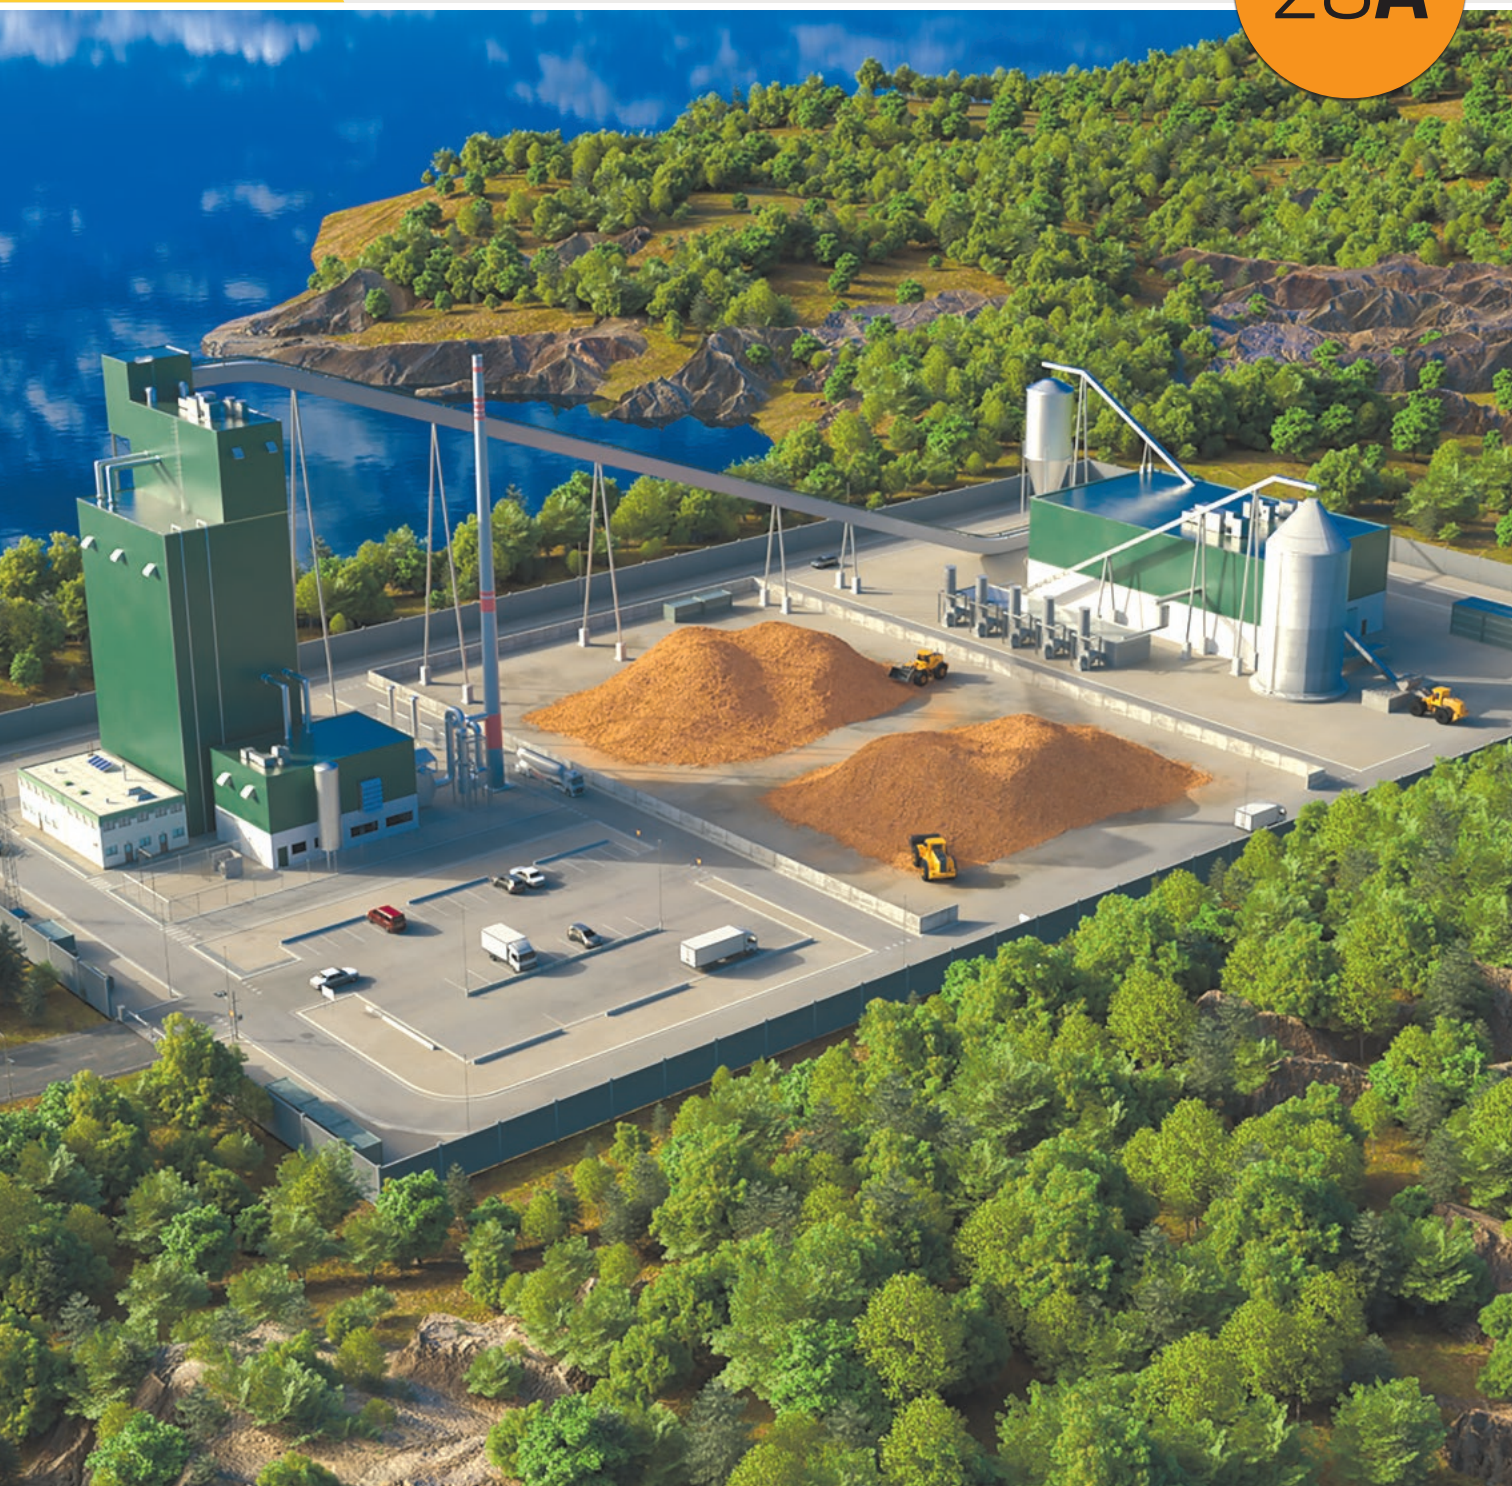

TBB.

Phoenix BioPower

BTC- Biomass Fired TopCycle. Doubling the efficiency
of power production from biomass

28A

Atawey

Hydrogen Refuelling Stations. Hydrogen refuelling stations serving all types of vehicles, whenever and wherever required

29A

Offshore wind

Athena

Hydrogen New Version.

Hydrogen derived from a waste-to-power solution

30A

FertigHy

FertigHy. Low-carbon fertiliser production to accelerate the decarbonisation of the food value chain

31A

HSL Technologies

Hydrosil. The first liquid inorganic hydrogen carrier
that makes hydrogen easy to deliver

32A

InnoEnergy

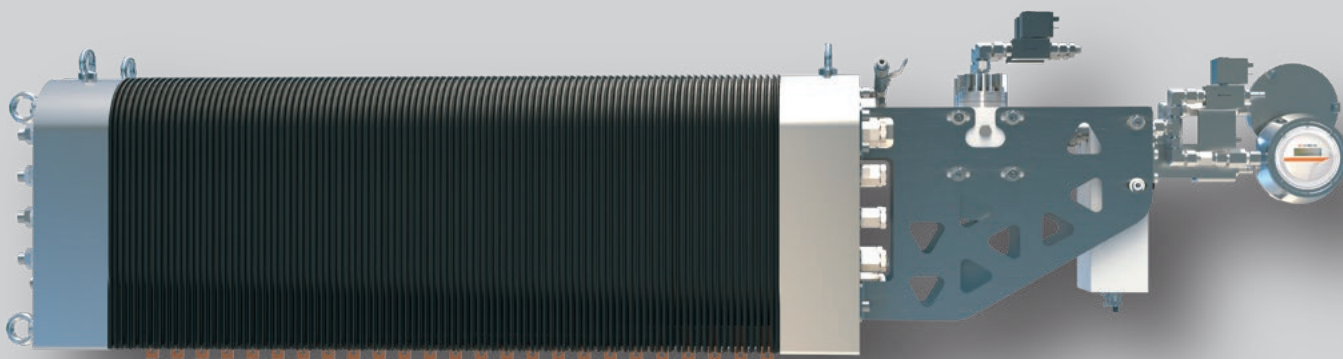

TBB.

Hymeth

Hyaeon. The most cost-efficient method
for producing green hydrogen

33A

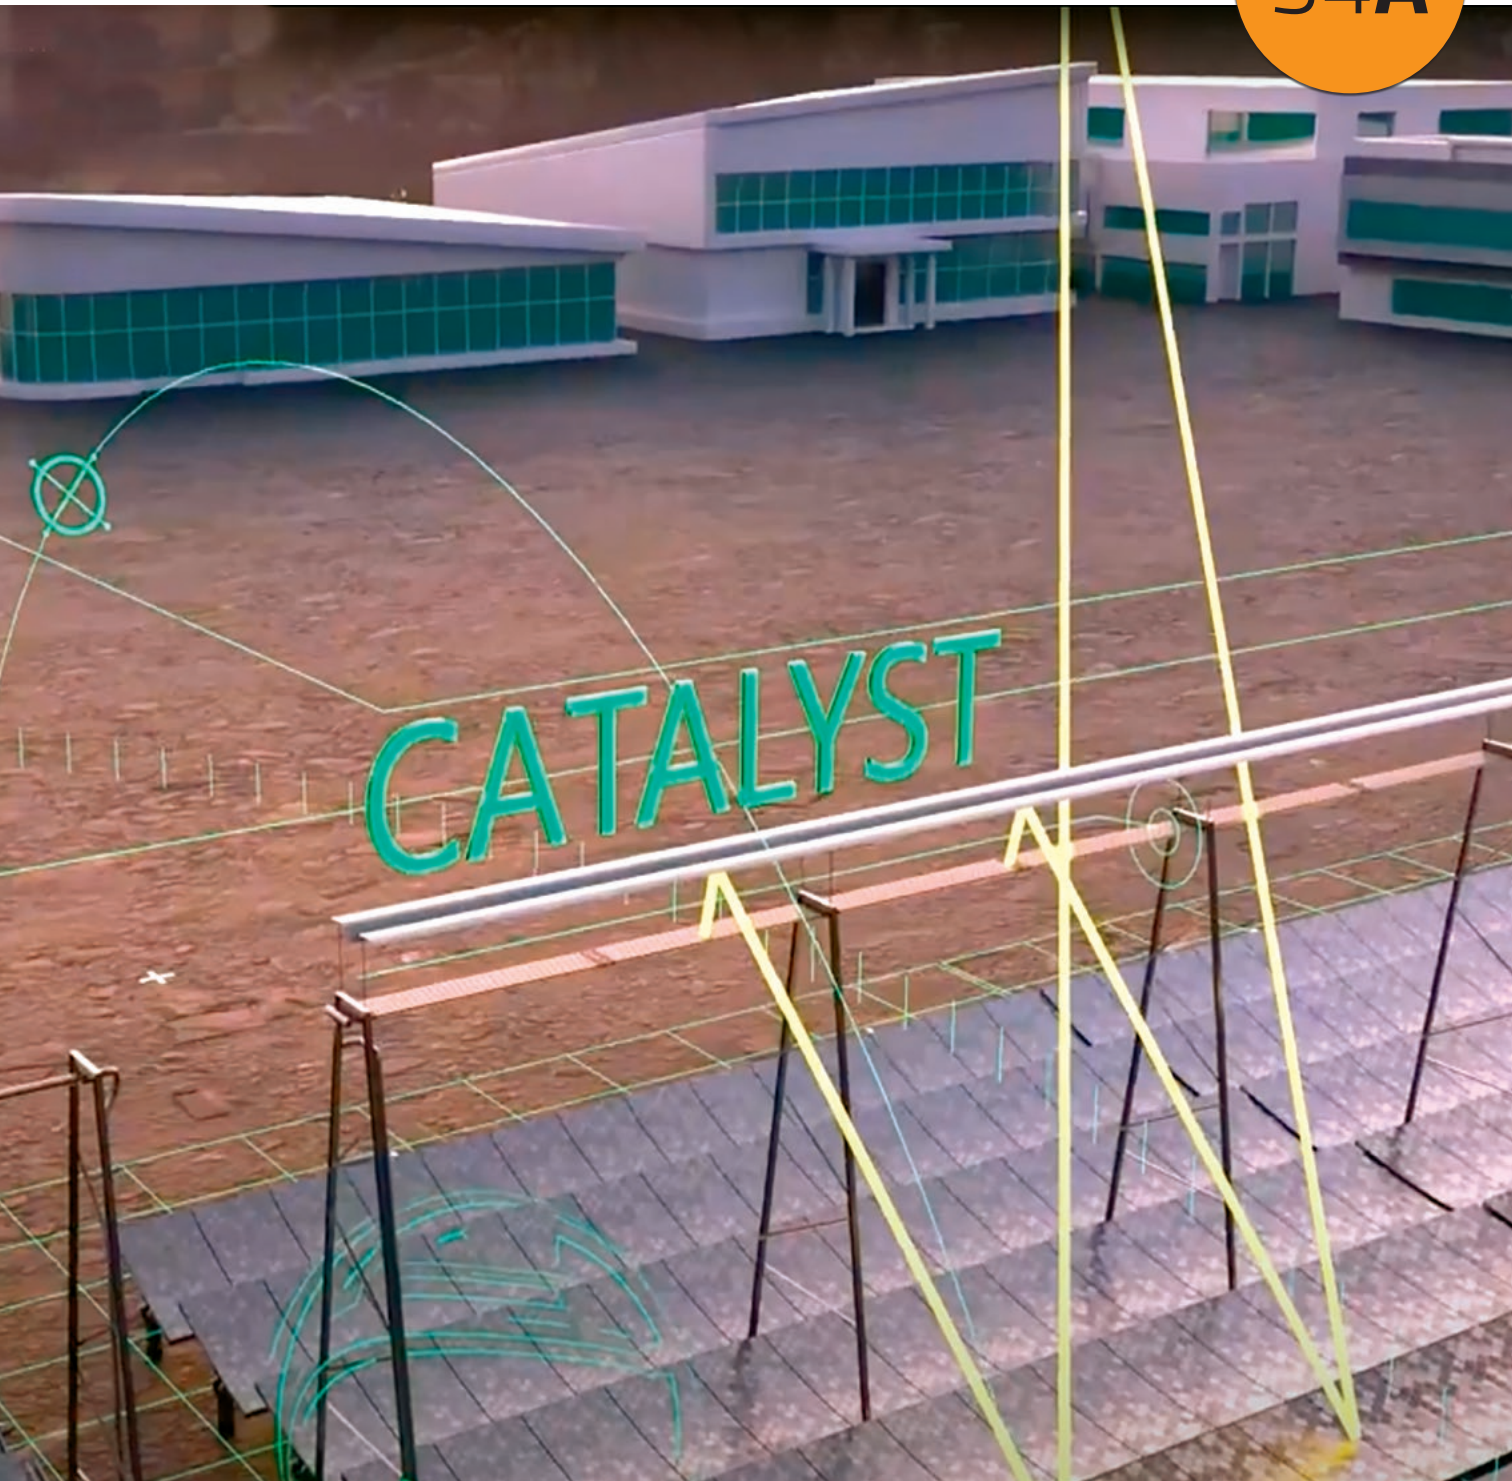

Hysun

Hysun. 100% clean and low-cost hydrogen obtained by a photo-thermo catalytic process fully off-grid

34A

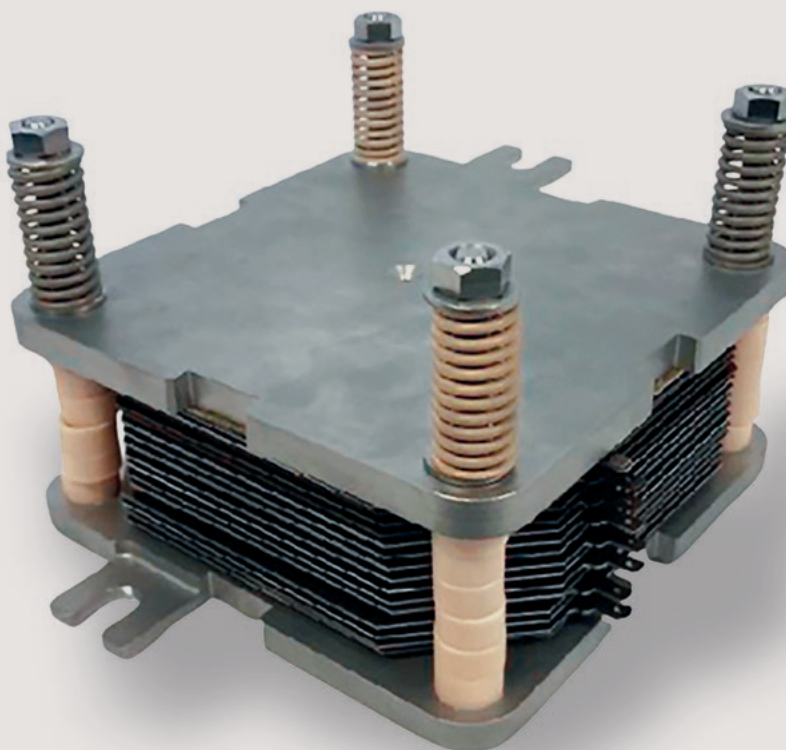

Kerionics

Kerionics. Highly efficient and cost effective electrolyzers

35A

Phynix

Green Hydrogen Production. Decarbonise your company
with green hydrogen

36A

InnoEnergy

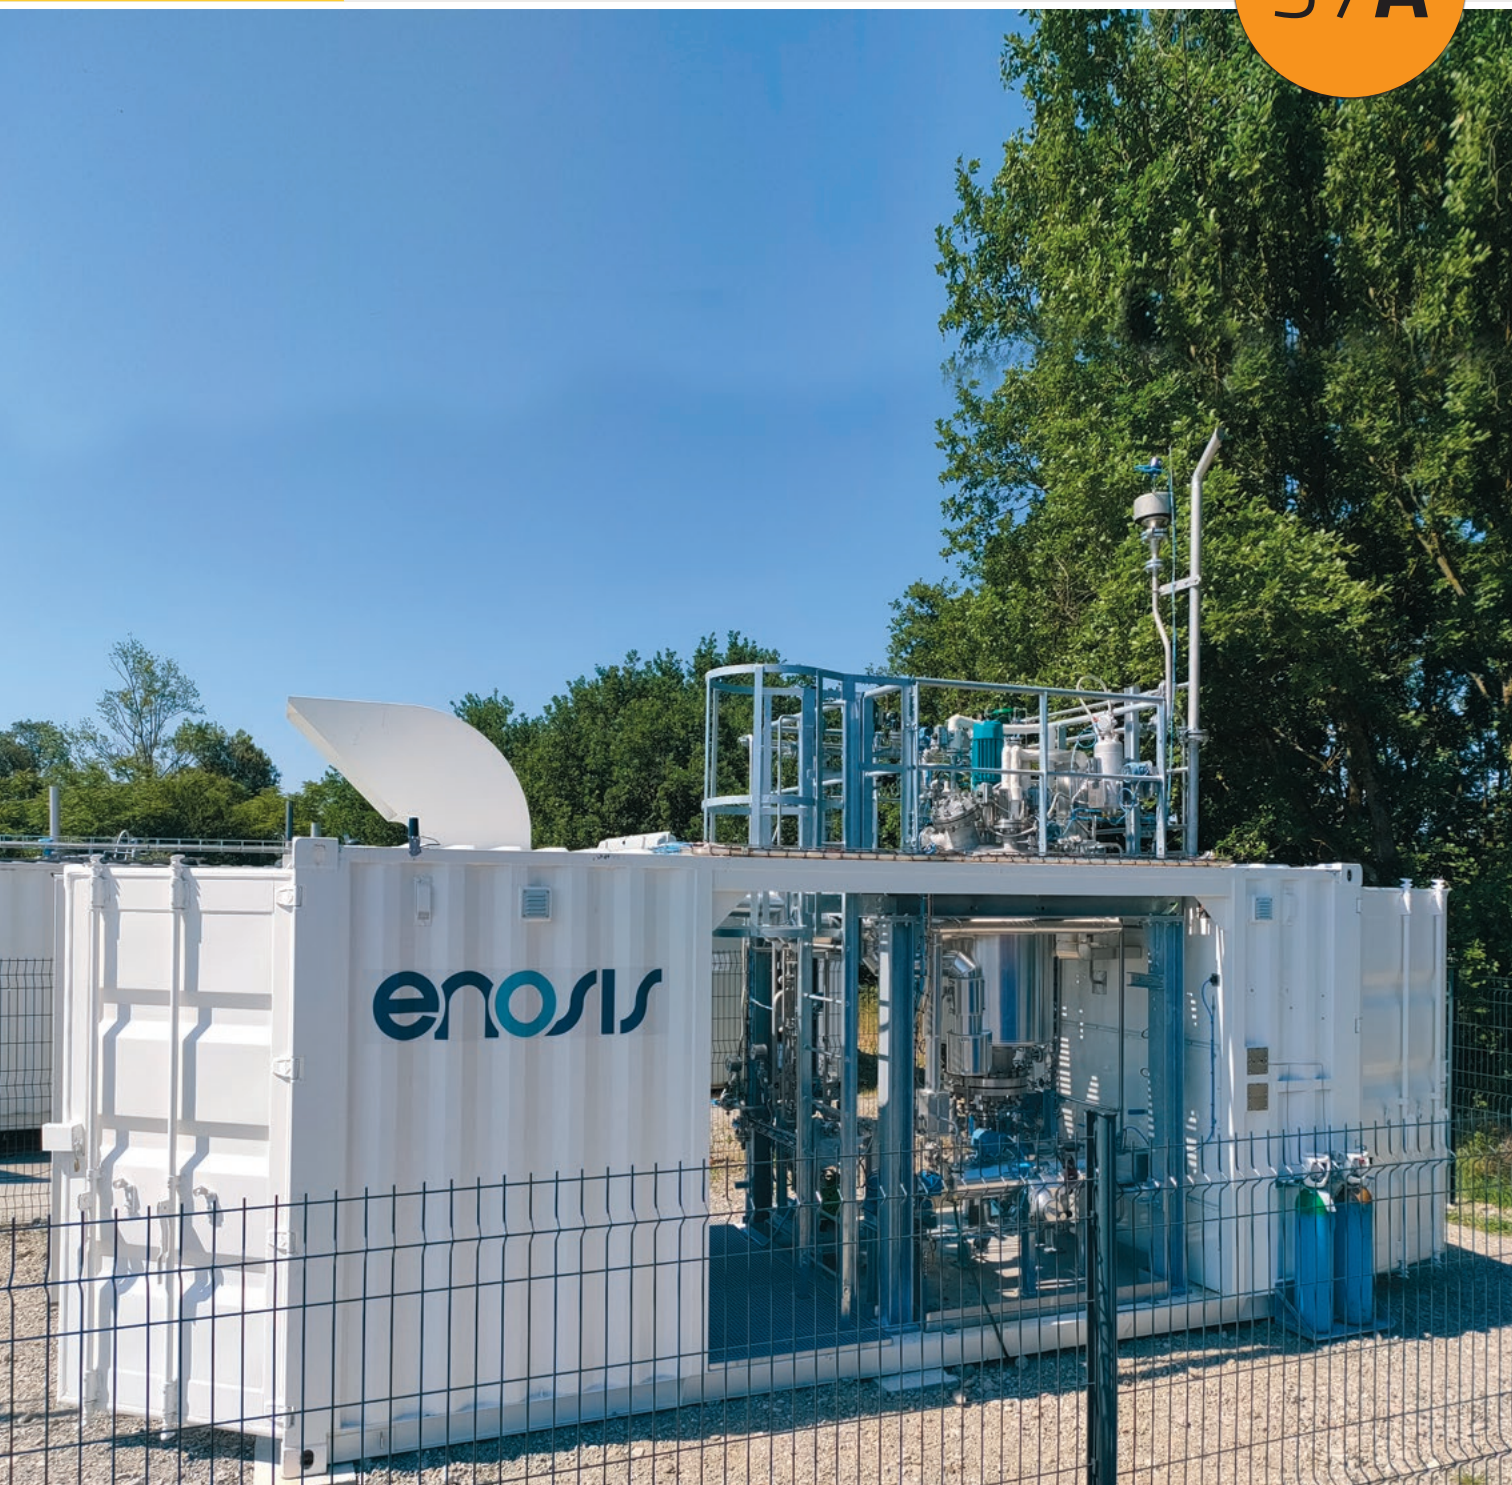

TBB.

Enosis

Enobio (biomethanation reactor). CO₂/biogas/syngas conversion solutions to produce renewable and low-carbon gas

37A

iNex

iNex Sourcing. For all companies looking for
industrial and agricultural waste deposits

38A

InnoEnergy

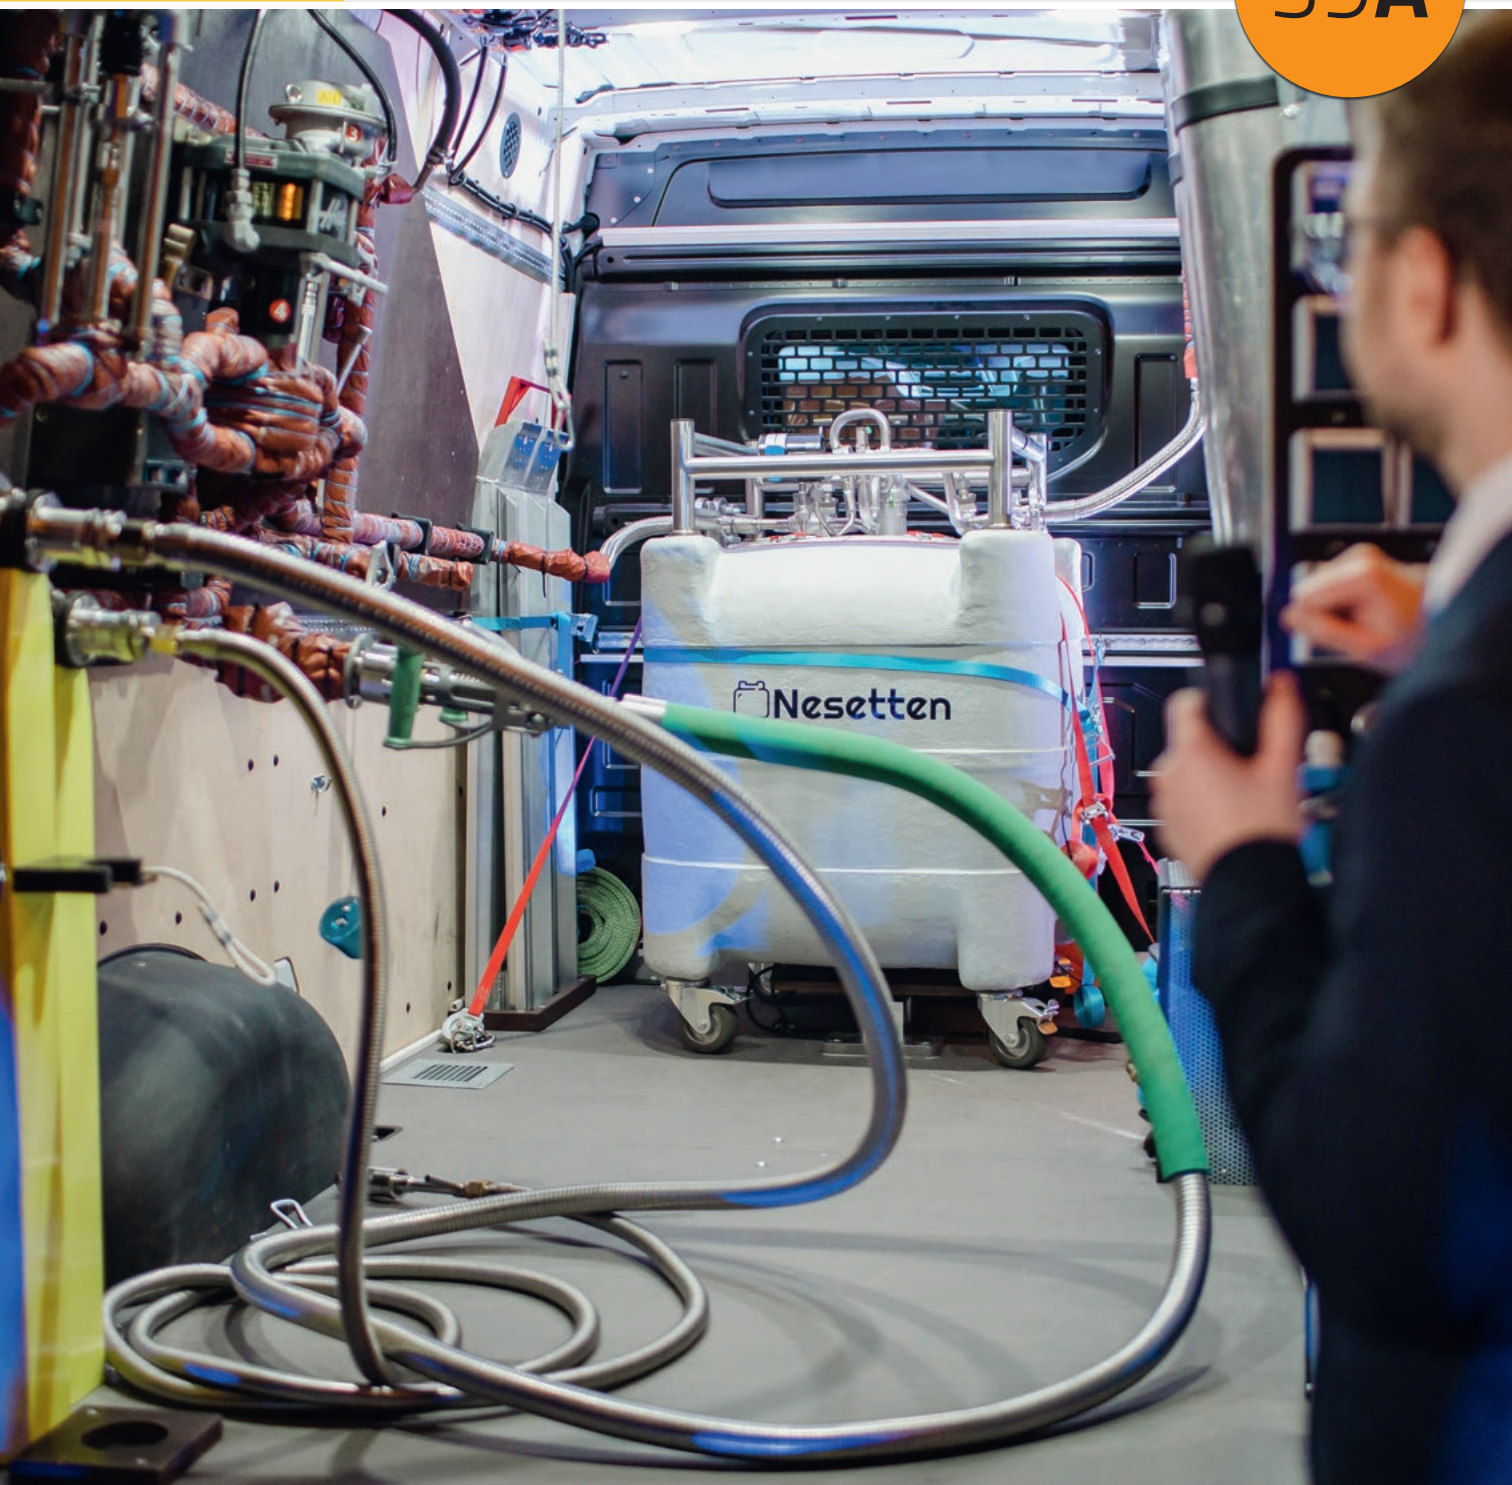

TBB.

Nesetten

Nesetten Cryo-bulk. Nano-scale cryogenic bulk:
a game-changer for (bio-) LNG

39A

ConnectPoint

NEXO. Meter data quality assurance as a service for utilities and energy

01B

nexo

Off Grid

MPOWER

MPowering the Future. A B2B2C platform supplying and financing small-scale solar infrastructure in emerging markets

02B

Bamboo Energy

Bamboo Energy. Empowering your flexibility

03B

Power DSO

InnoEnergy

TBB.

ENEIDA

eneida DeepGrid®. An operational analytics platform
that manages LV networks

04B

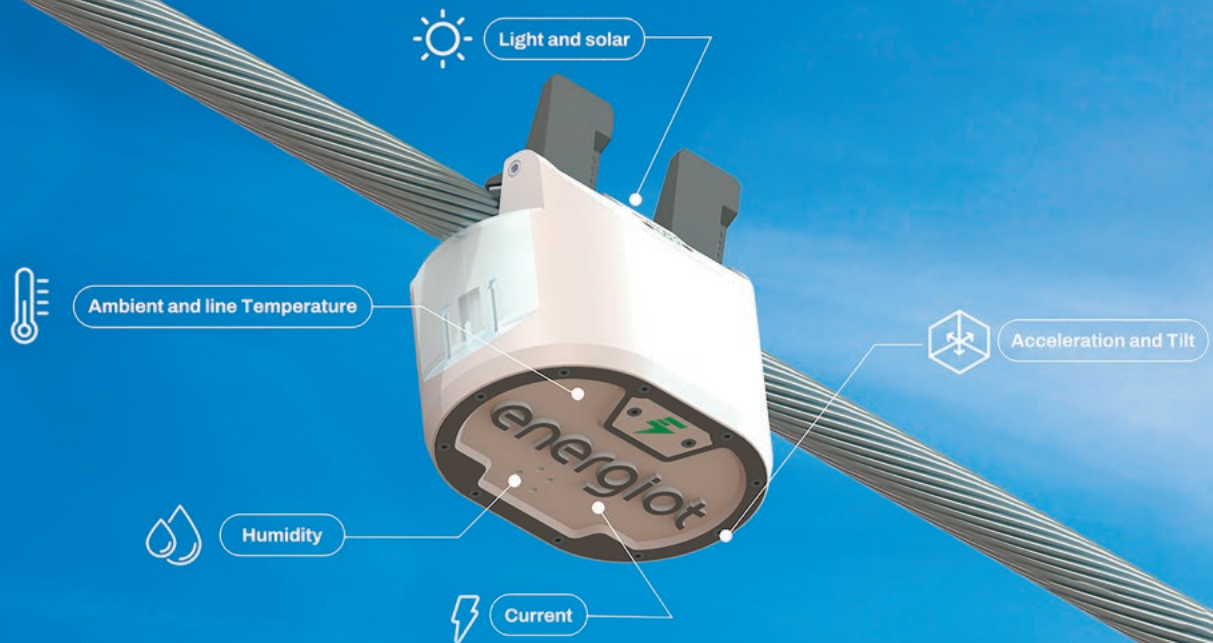

Energiot

Global battery-free IoT network for a smarter grid. IoT devices for grids that enhance energy efficiency, reduce costs and boost renewables

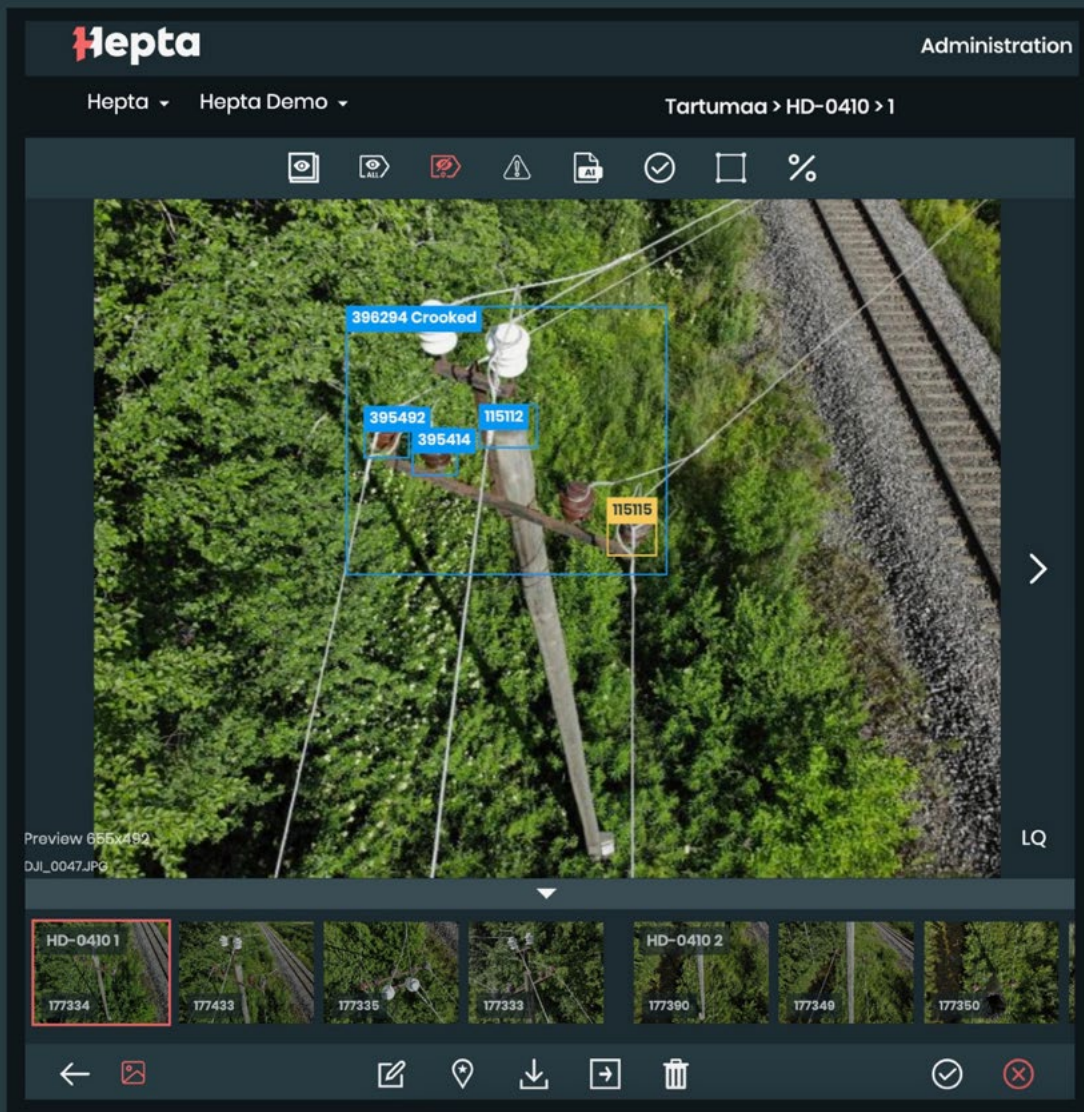

05B

Hepta Insights

Hepta Insights. AI-enhanced power grid analysis software. Insights into the grid to help utilities increase grid resilience and reduce disconnection rates

**06B**

OmegaLambdaTec

Smart Grid Simulation Model. Enhance your grid
with precision and foresight

07B

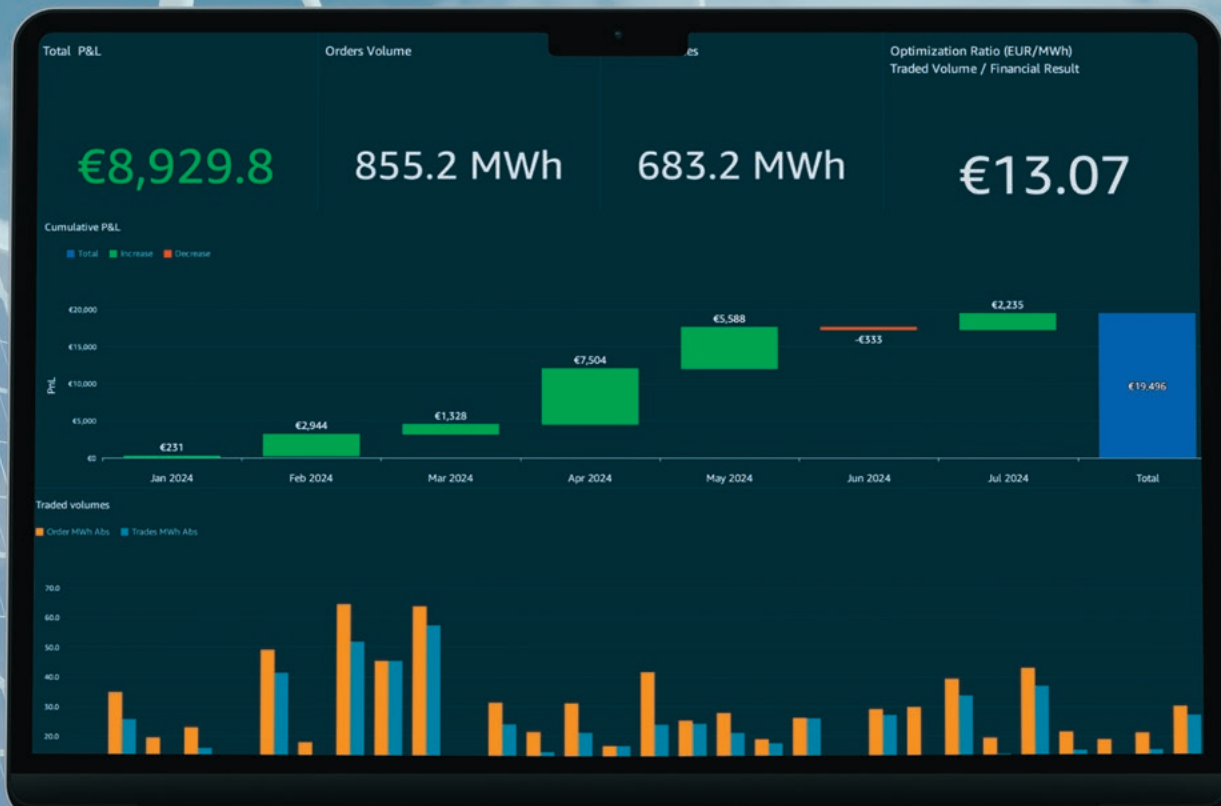

TokWise

TokWise. Transforms trading in renewables.

08B

InnoEnergy

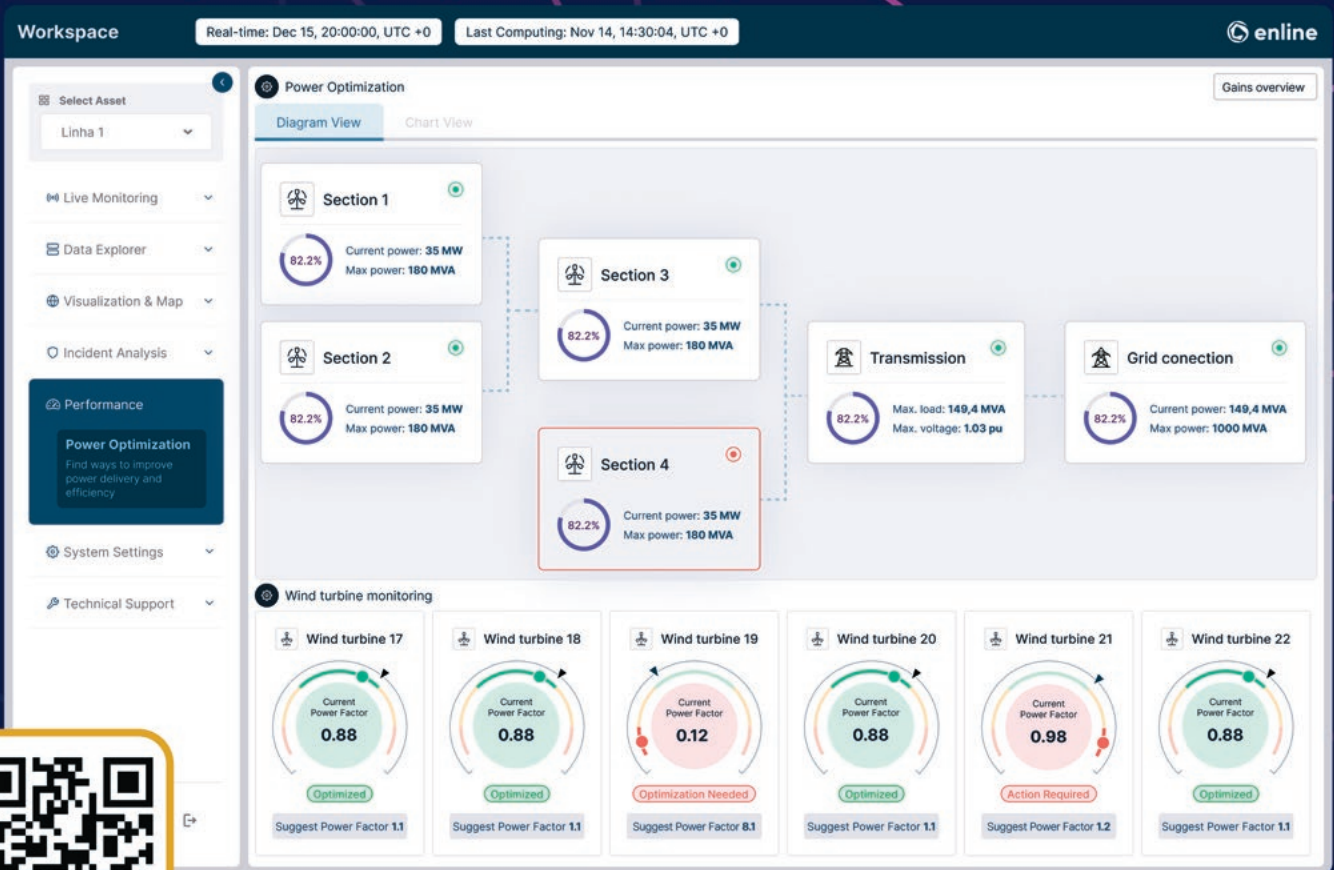

TBB.

Enline

Digital twin technologies for power grids. Monitoring system combining enhanced power, fault location and optimised engineering

09B

Spottitt

Spottitt Metrics Factory. Effortless integration of remotely sensed data and derived analytics for more frequent and insightful digital monitoring of energy assets

10B

Altris

Fennac. Sustainable high energy density cathode material
for stationary storage solutions

01C

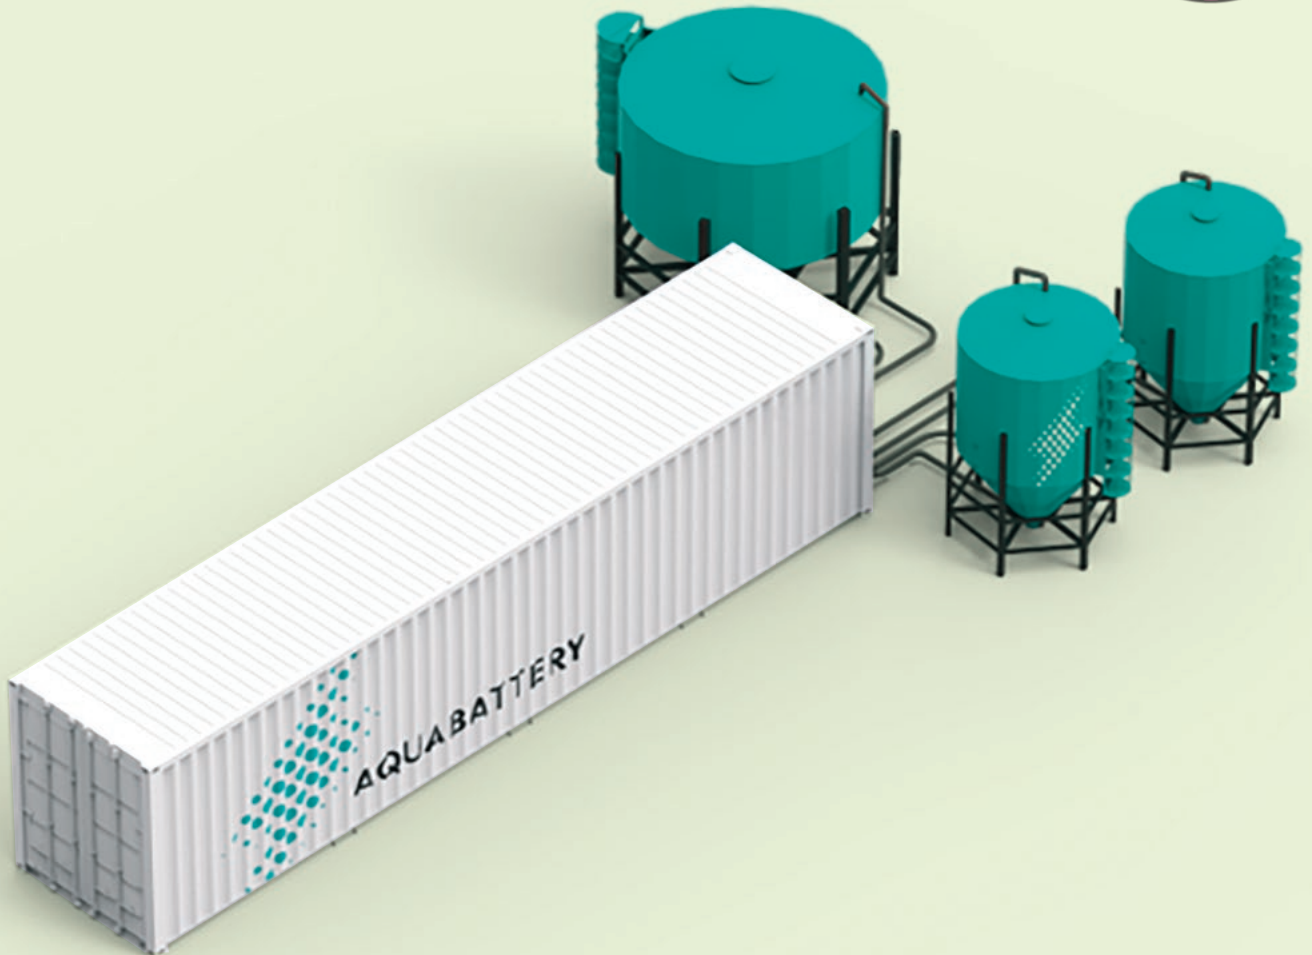

AquaBattery

AquaBattery. Revolutionising long duration energy storage

02C

InnoEnergy

TBB.

Basquevolt

Basquevolt. The safest and most competitive solid-state battery

03C

BeePlanet Factory

BZell, BCube, BCompact & BHive. Sustainable energy storage solutions based on automotive sector batteries

04C

InnoEnergy

TBB.

Charge2Change

C2C Go-Start. Supercapacitor solution for sustainable mobility

05C

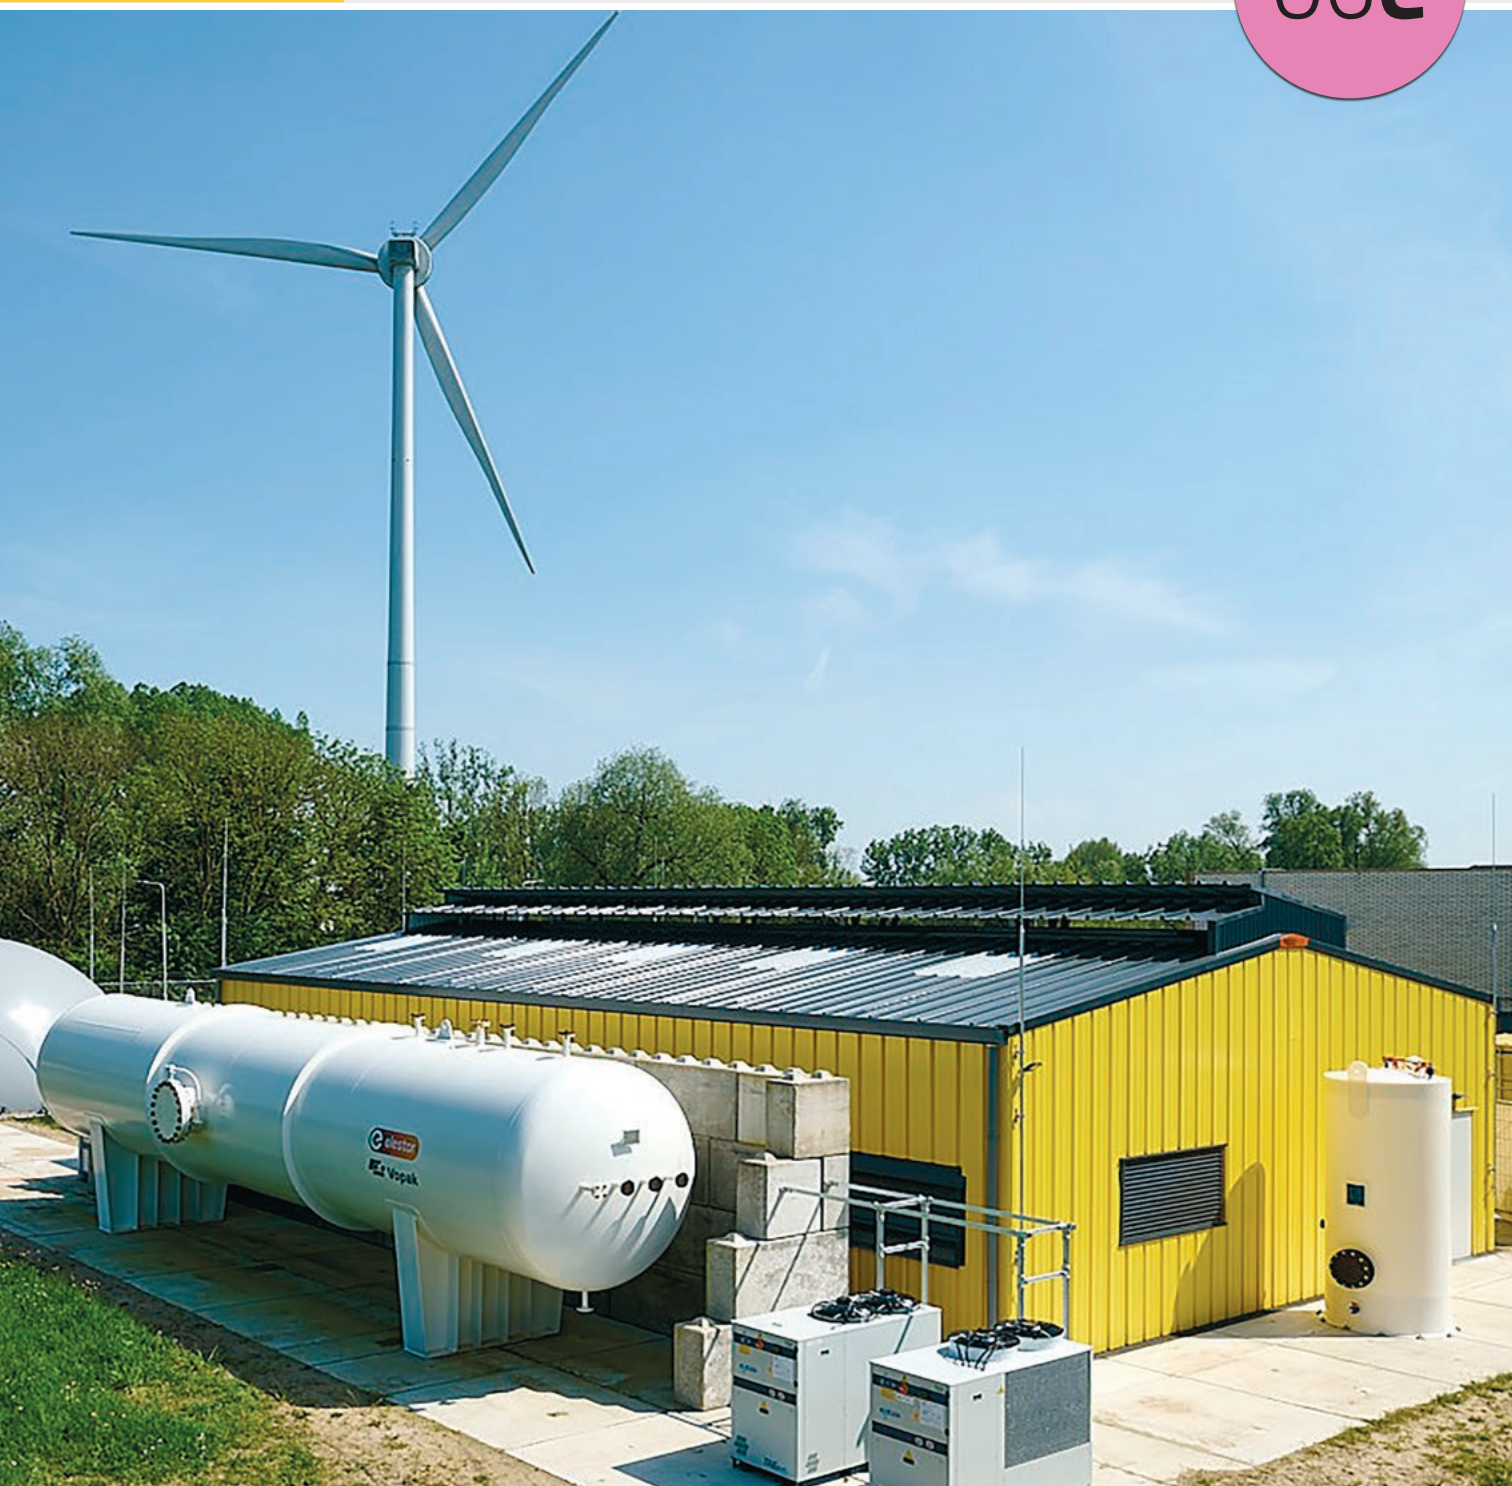

Elestor

Elestor - electricity storage (LDES). Revolutionary low-cost electricity storage in a hydrogen-X flow battery

06C

InnoEnergy

TBB.

ElevenEs

ElevenEs. Empower everything

07C

Euro Manganese

Euro Manganese - Chvaletice Manganese Project.

Recycling yesterday's waste to support Europe's e-mobility future

08C

Extremadura New Energies

San José Lithium Project. Integrated underground mine and battery grade lithium chemicals production facility

09C

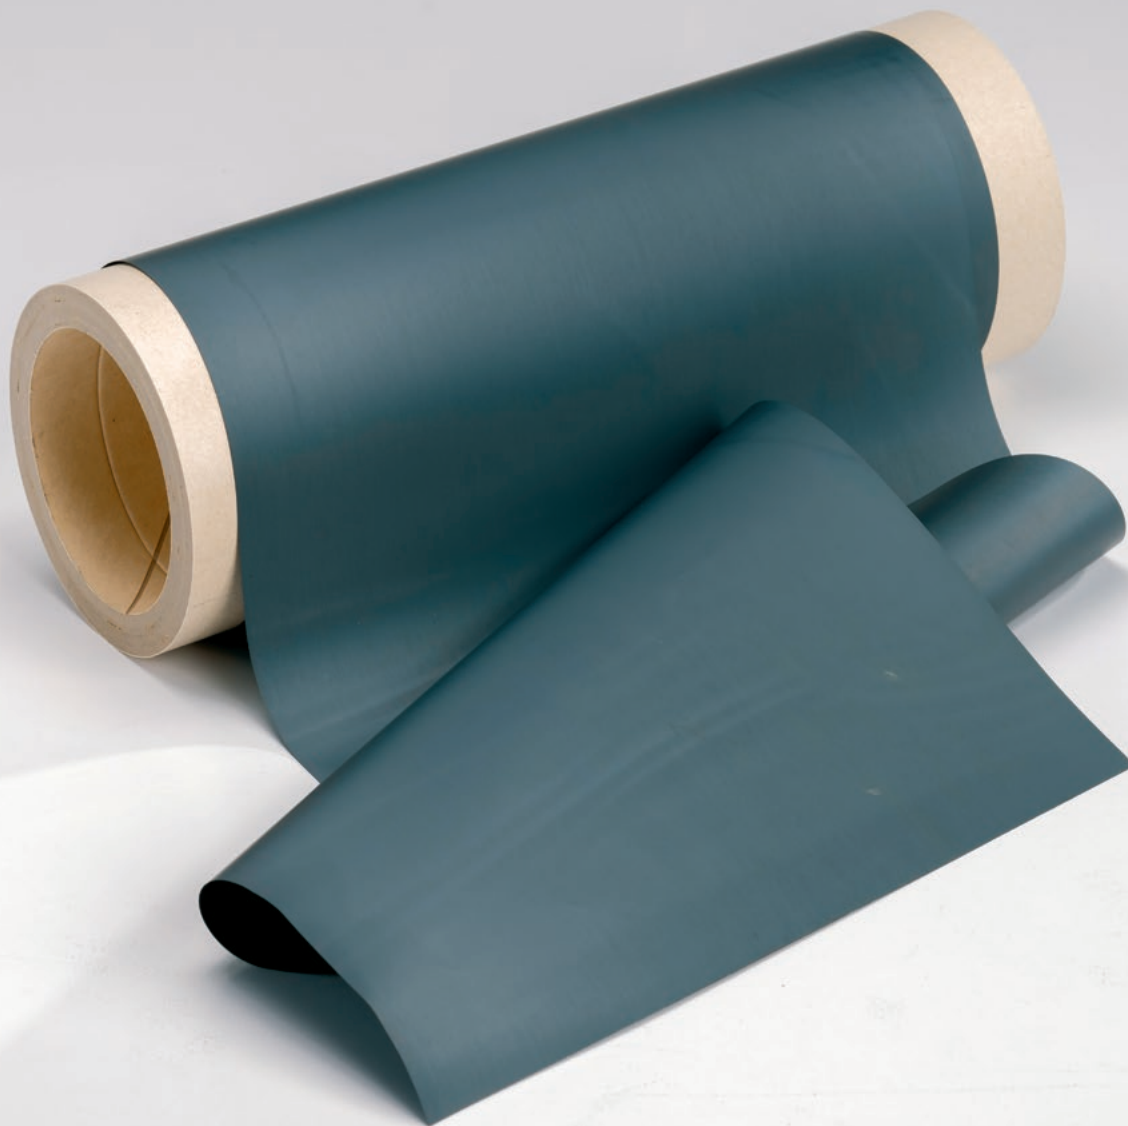

GDI

100% Silicon Anodes for Li-ion batteries. 100% silicon anodes that enable longer-lasting, faster-charging batteries with a secure supply chain

10C

InnoEnergy

TBB.

HeatVentors

HeatTank. An intelligent thermal battery

11C

Mecaware

Mecaware. Strategic raw materials produced
by recycling end-of-life batteries and scraps

12C

InnoEnergy

TBB.

Mine Storage

Mine Storage. Enabling the sustainable energy transition

13C

Prime

Prime. European energy storage systems manufacturer delivers solutions both behind and after the meter

14C

Pure Battery Tech

Pure Battery Tech. Producers of superior pCAM products for EV batteries

15C

Repono

Repono. Shaping Europe's large-scale sustainable power system for tomorrow

16C

Rivus

Rivus Batteries. Long duration energy storage
using organic flow batteries

17C

Silbat

Silbat. Long duration electricity storage in melting silicon

18C

Skeleton

Skeleton Supercapacitors.

Next generation supercapacitors for energy storage

19C

Suena

Suena. Autopilot for energy storage

20C

InnoEnergy

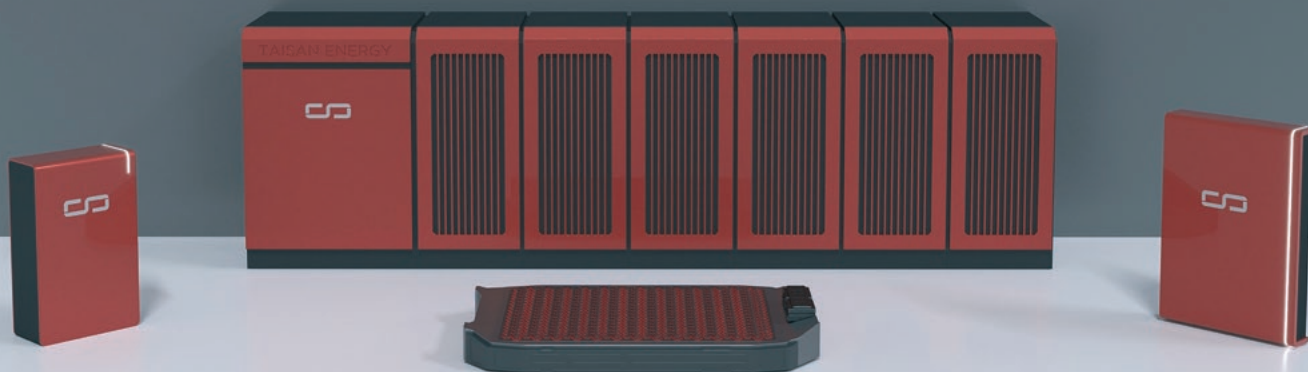

TBB.

TaiSan

TaiSan. A novel quasi-solid-state sodium metal battery

21C

The Batteries

The Batteries. Thin-film lithium-ion batteries that outperform conventional lithium-ion batteries

22C

Verkor

Battery-cell manufacturer for southern Europe.

Batteries. Now. For the future

23C

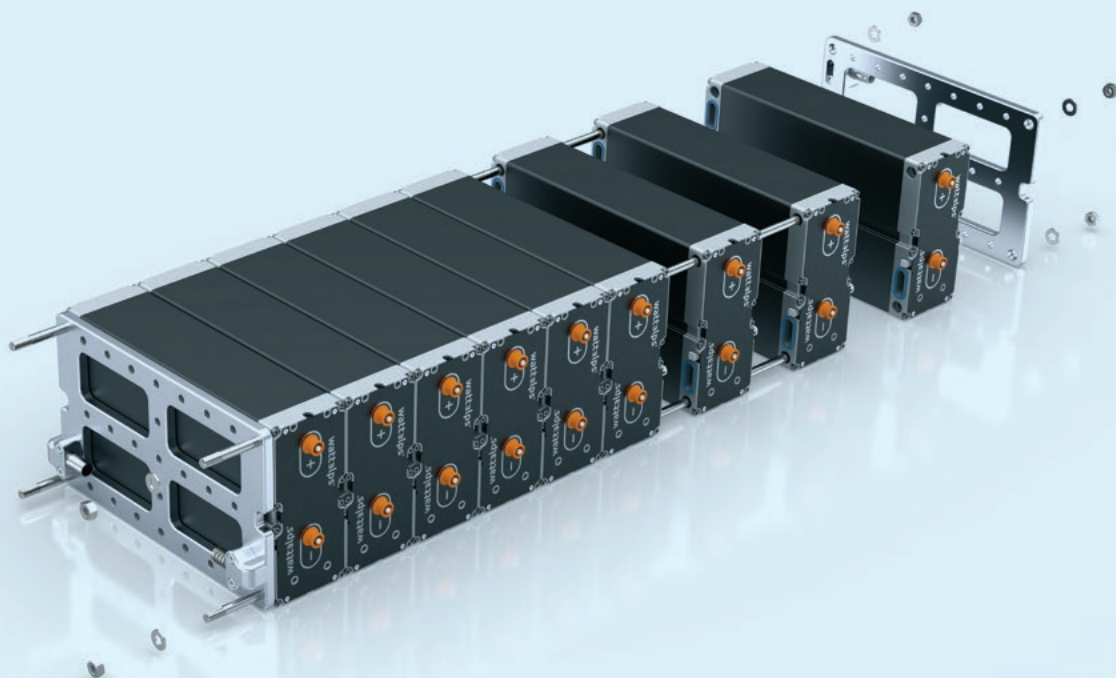

Wattalps

Advanced Lithium Power Systems. Affordable high performance batteries for the industrial vehicle market

24C

AC Biode

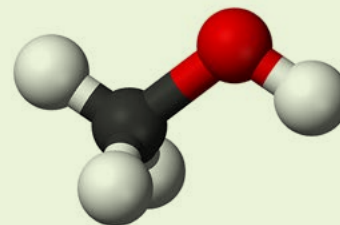

Plastalyst. Green, safe and efficient catalysts
that make plastic recycling financially attractive

01D

+ Water
180°C

**Methanol
(gas)**

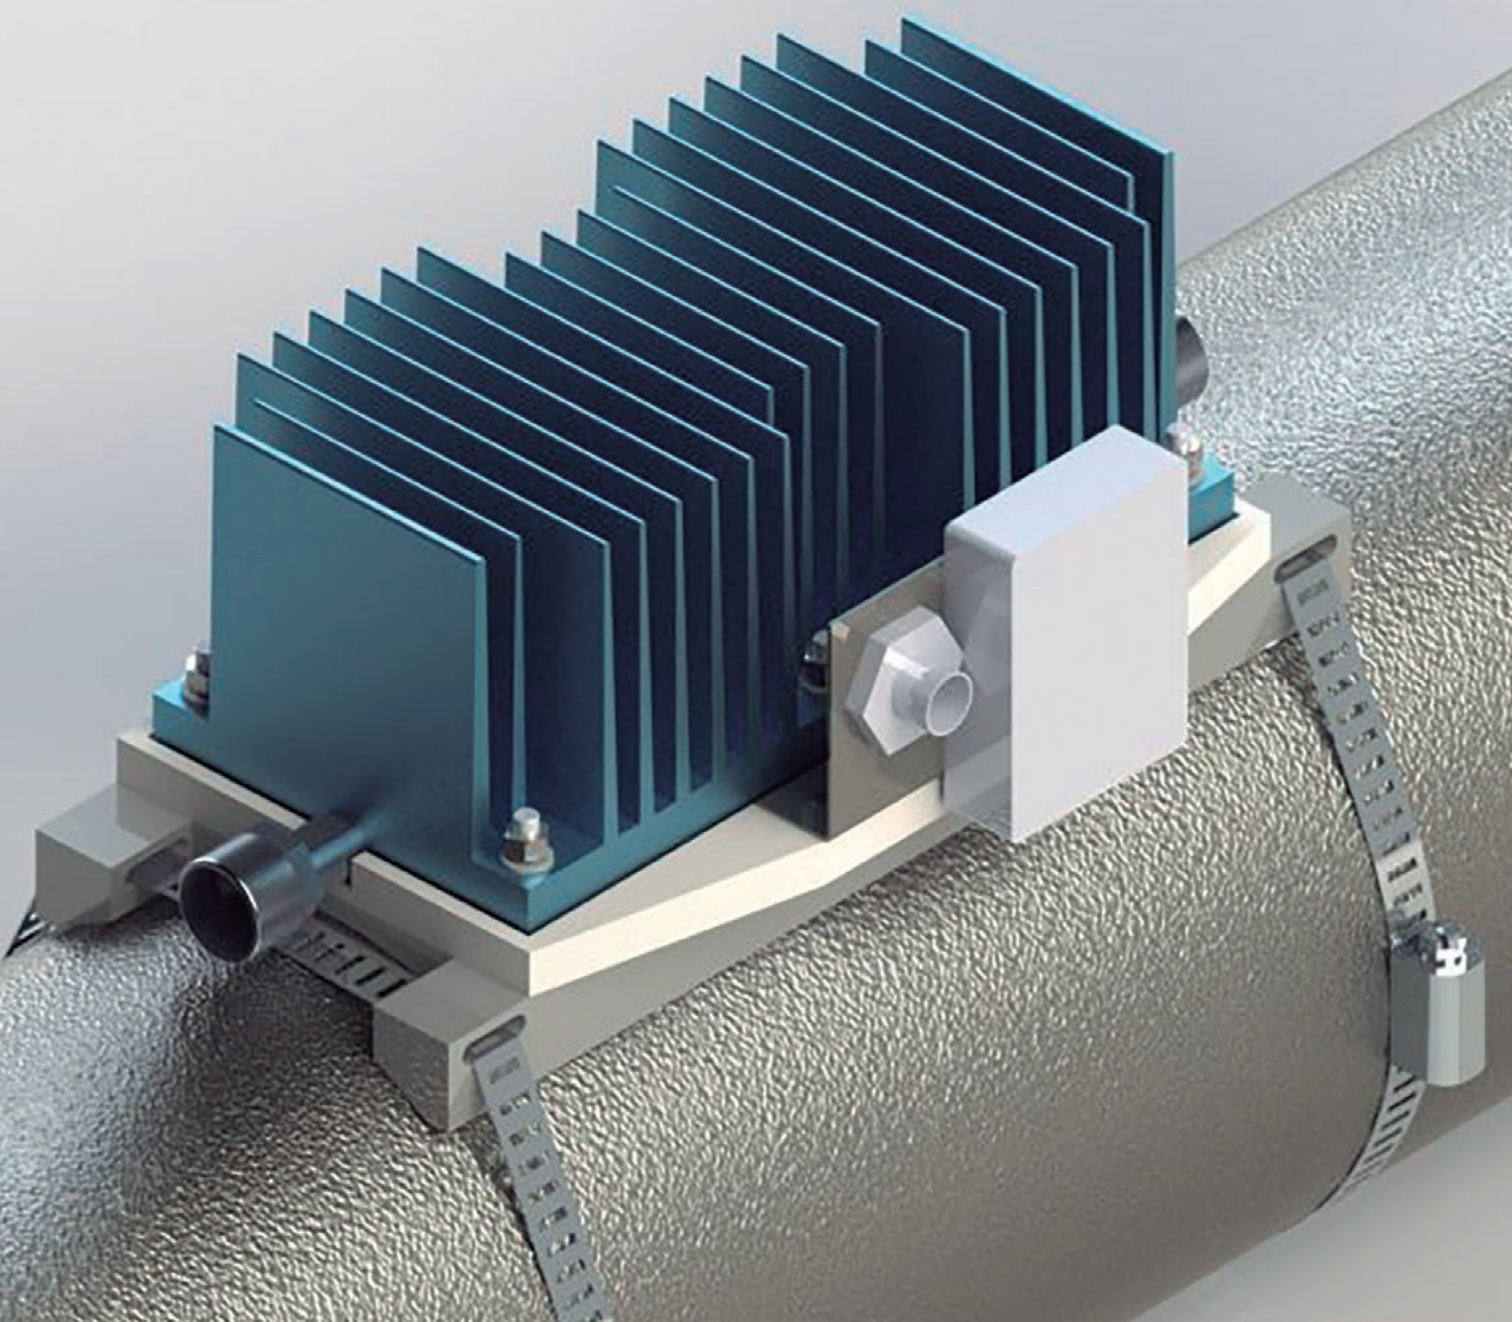

AEInnova

InduEye. Wireless long-range edge computing IoT architecture
powered by waste heat

02D

Alpinov X

GEN 4. Energy efficient district and data centre cooling

03D

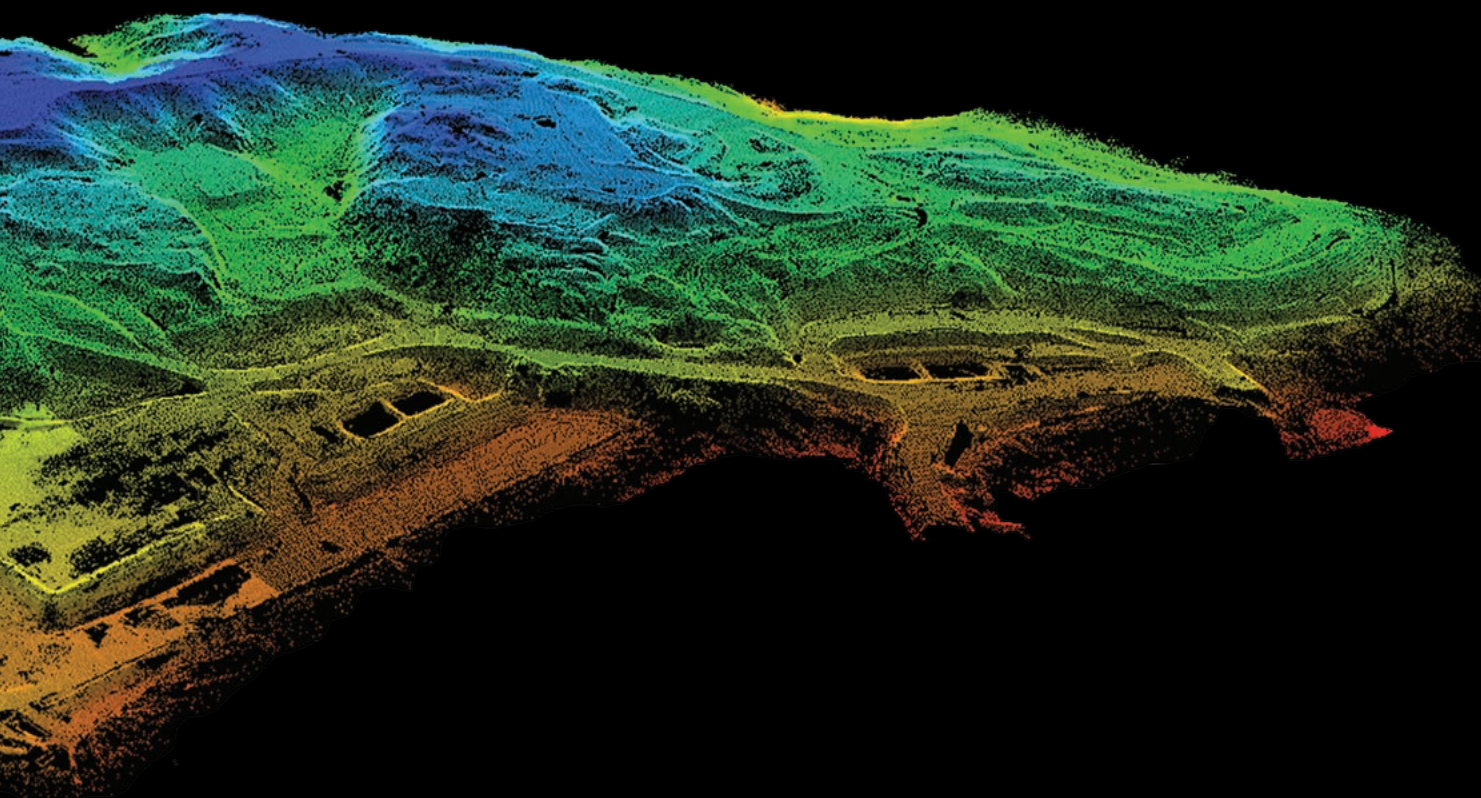

Beholder

AI for sustainable minerals exploration.

Web GIS powered with AI for the exploration of critical minerals

04D

Carbon Centrum

Carbon Centrum. Company sustainability targets that align with employees to 'measure, act & reduce'

05D

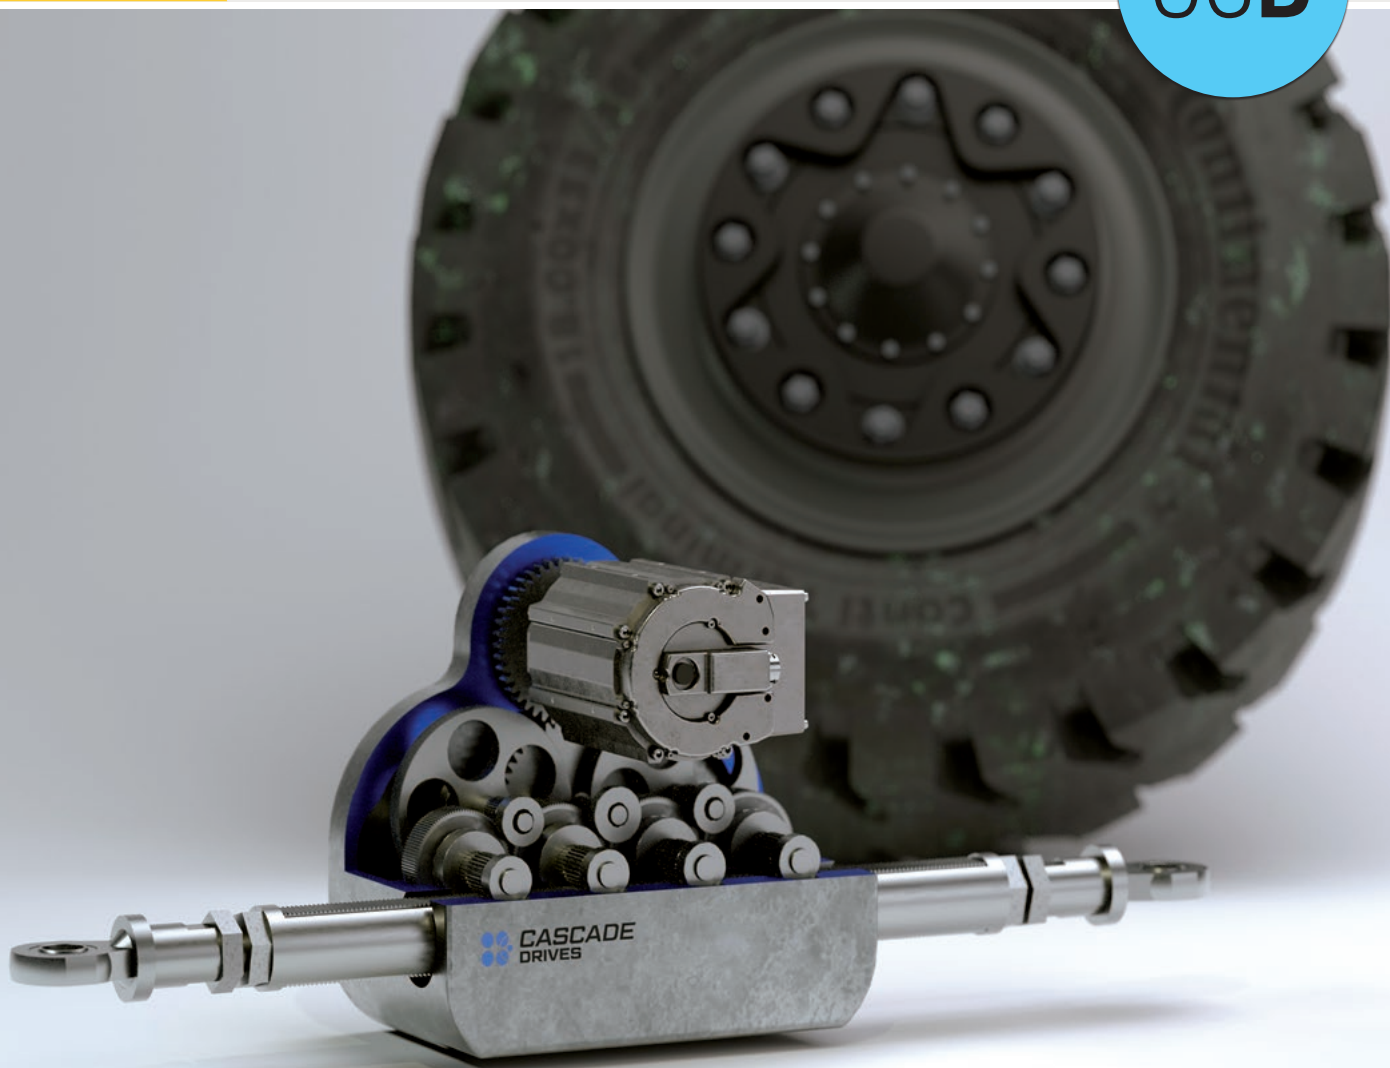

Cascade Drives

Electromechanical linear drives.

Linear drives to electrify linear motion in heavy machines

06D

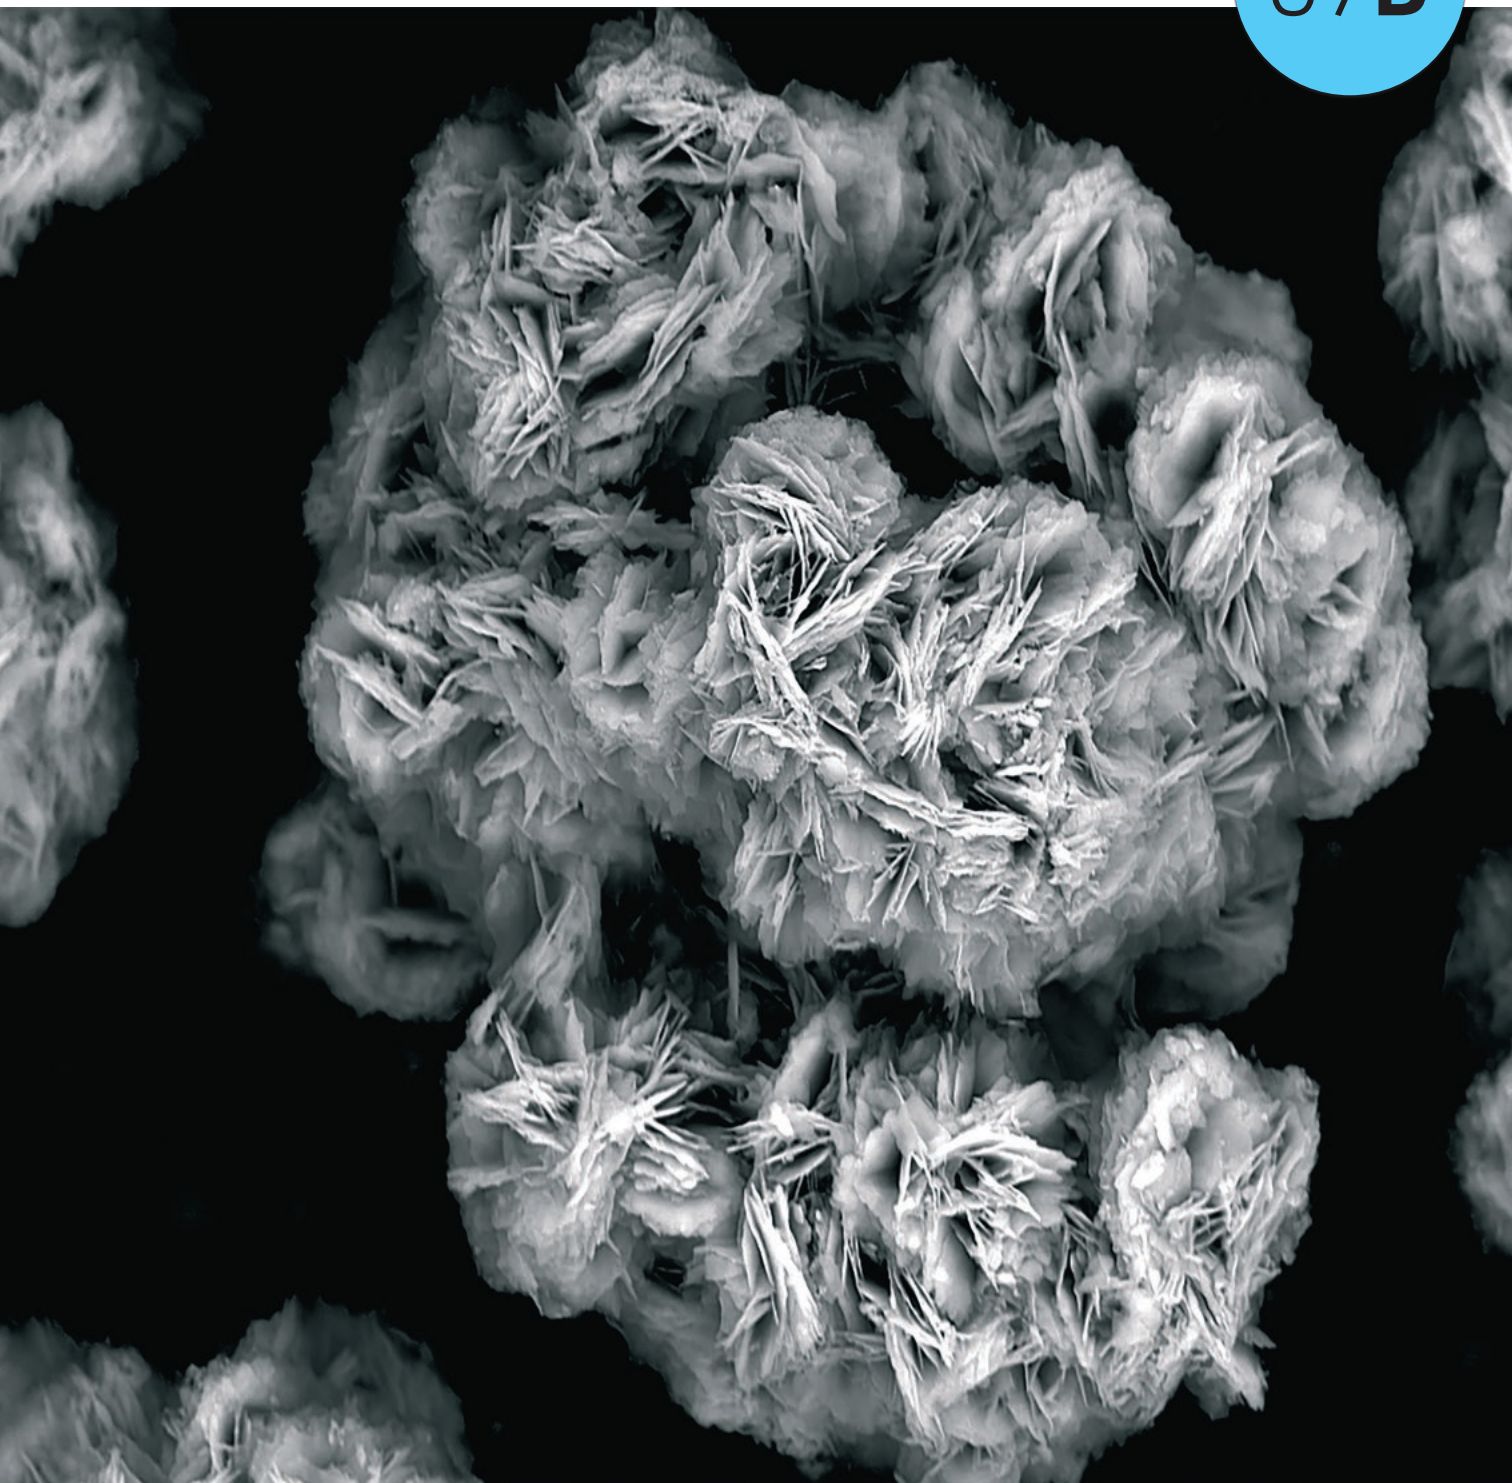

Catalyco

Catalyco's Sustainable Zinc Oxide - rZnO. A circular economy supply chain for ZnO to help industry meet ESG targets

07D

Descarbonize

Descarbonize. Taking control of supply chain emissions

08D

InnoEnergy

TBB.

Ecop

High Temperature Heat Pump. Efficient high temperature heat pump for industrial applications

10D

Energency

Energency. Decarbonising factories by leveraging human and artificial intelligence

11D

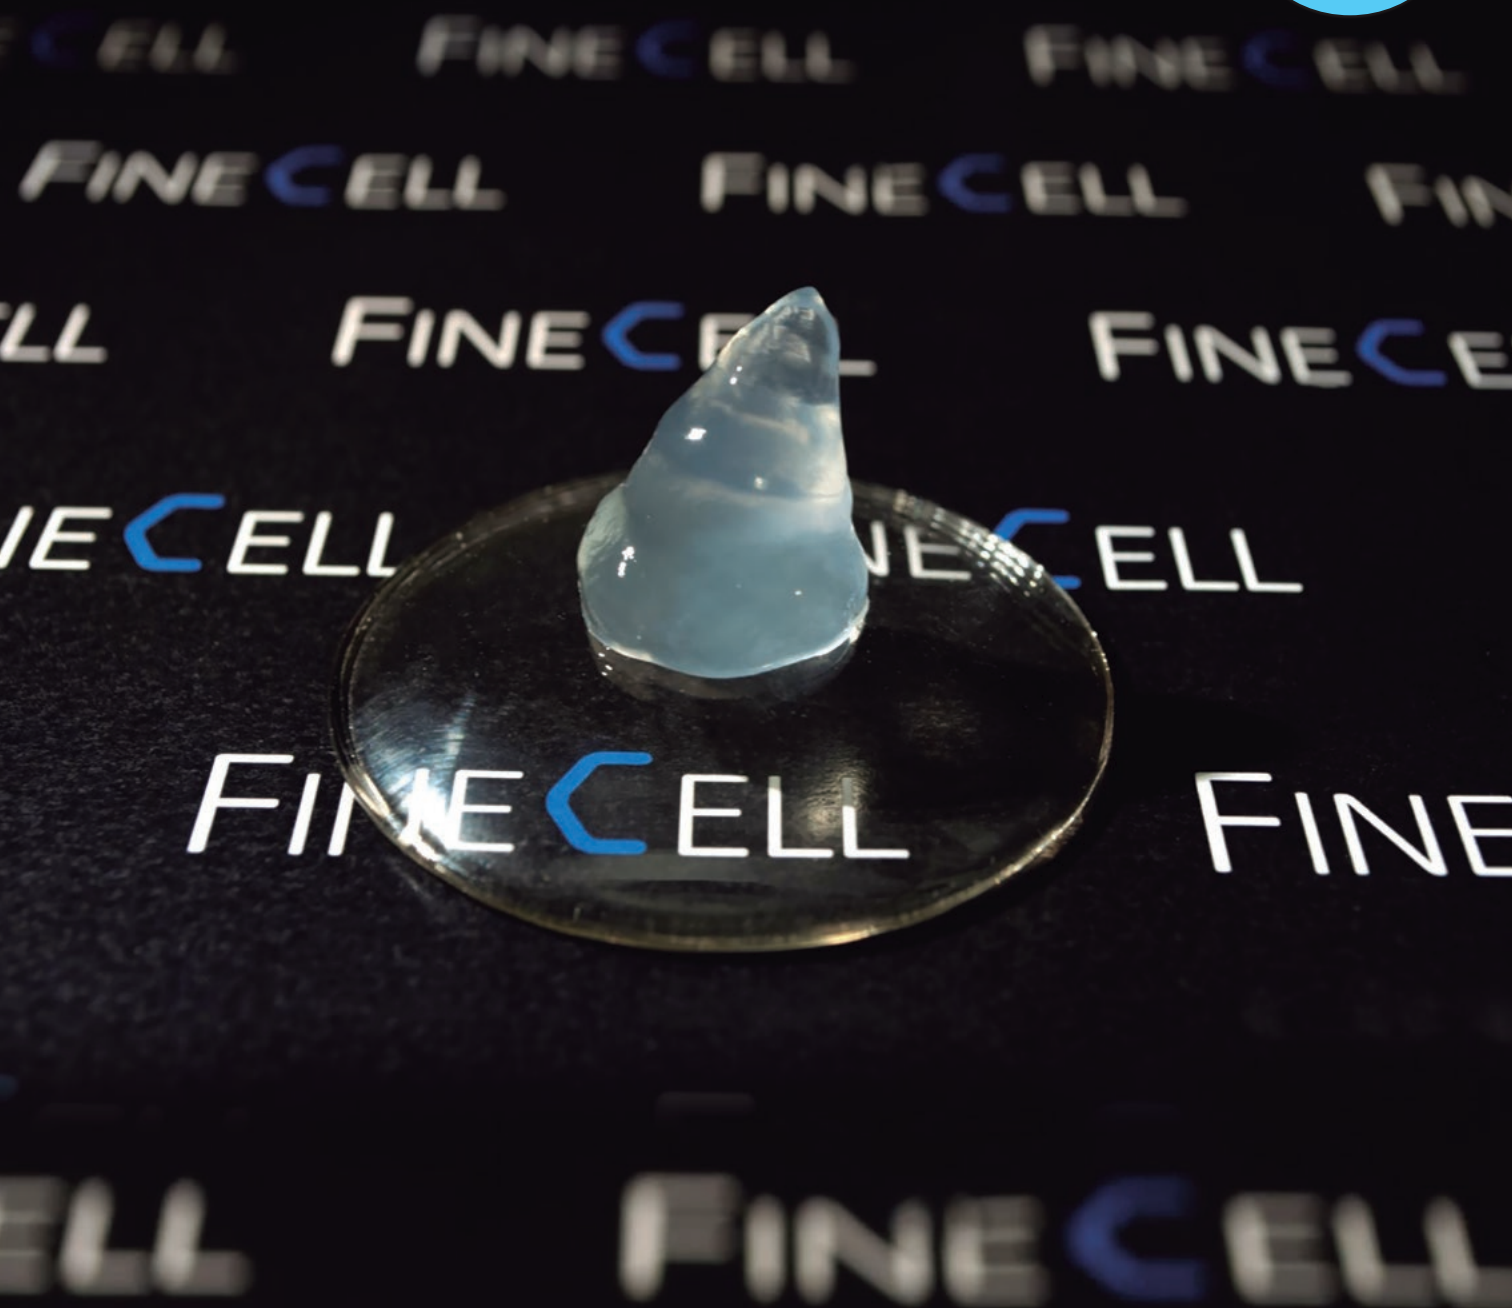

FineCell

Cellulose micro-/nanofibers. Cellulose micro-/nanofibers for enhanced product performance and reduced carbon footprint

12D

Flexidao

Inventory. Minimises market risk, reduces operational costs
and automates CDP and RE100 reporting processes

13D

InnoEnergy

TBB.

Geolinks

FlowTerra. Innovative, safe and flexible subsurface monitoring

14D

InnoEnergy

TBB.

Gravithy

Gravithy. A sustainable iron company

15D

Heat Power

Heat Power. Supercharged steam turbine systems
for industrial heat and power

16D

InnoEnergy

TBB.

Heliac

Heliac solar collectors and thermal energy storage. CO₂-free heat for industries and district heating that is cheaper than fossil fuels

**17D**

Ligneasy

LignEasy. Unlocking lignin on a large scale from kraft pulp mills

18D

MAQ

Self-Tuning Mass Damper. Energy saving cutting tools

19D

NitroCapt

Sunifix. Fossil-free Nitrogen Fertilisers

20D

InnoEnergy

TBB.

Nordic SeaFarm

Nordic SeaFarm. Ocean-grown seaweed on scale
in the ocean to decarbonise supply chains

21D

Nordluft

High capacity drone-based spreading system.

Efficient and high precision spreading in forestry and agriculture

22D

Percyro

Focused microwave power. Smartly focused
microwave power for material processing

23D

A thermal image showing a material with a central hot spot. The hot spot is indicated by a white crosshair and the text '>150C'. The surrounding material is shown in various shades of orange, yellow, and red, indicating different temperature levels.

>150C

InnoEnergy

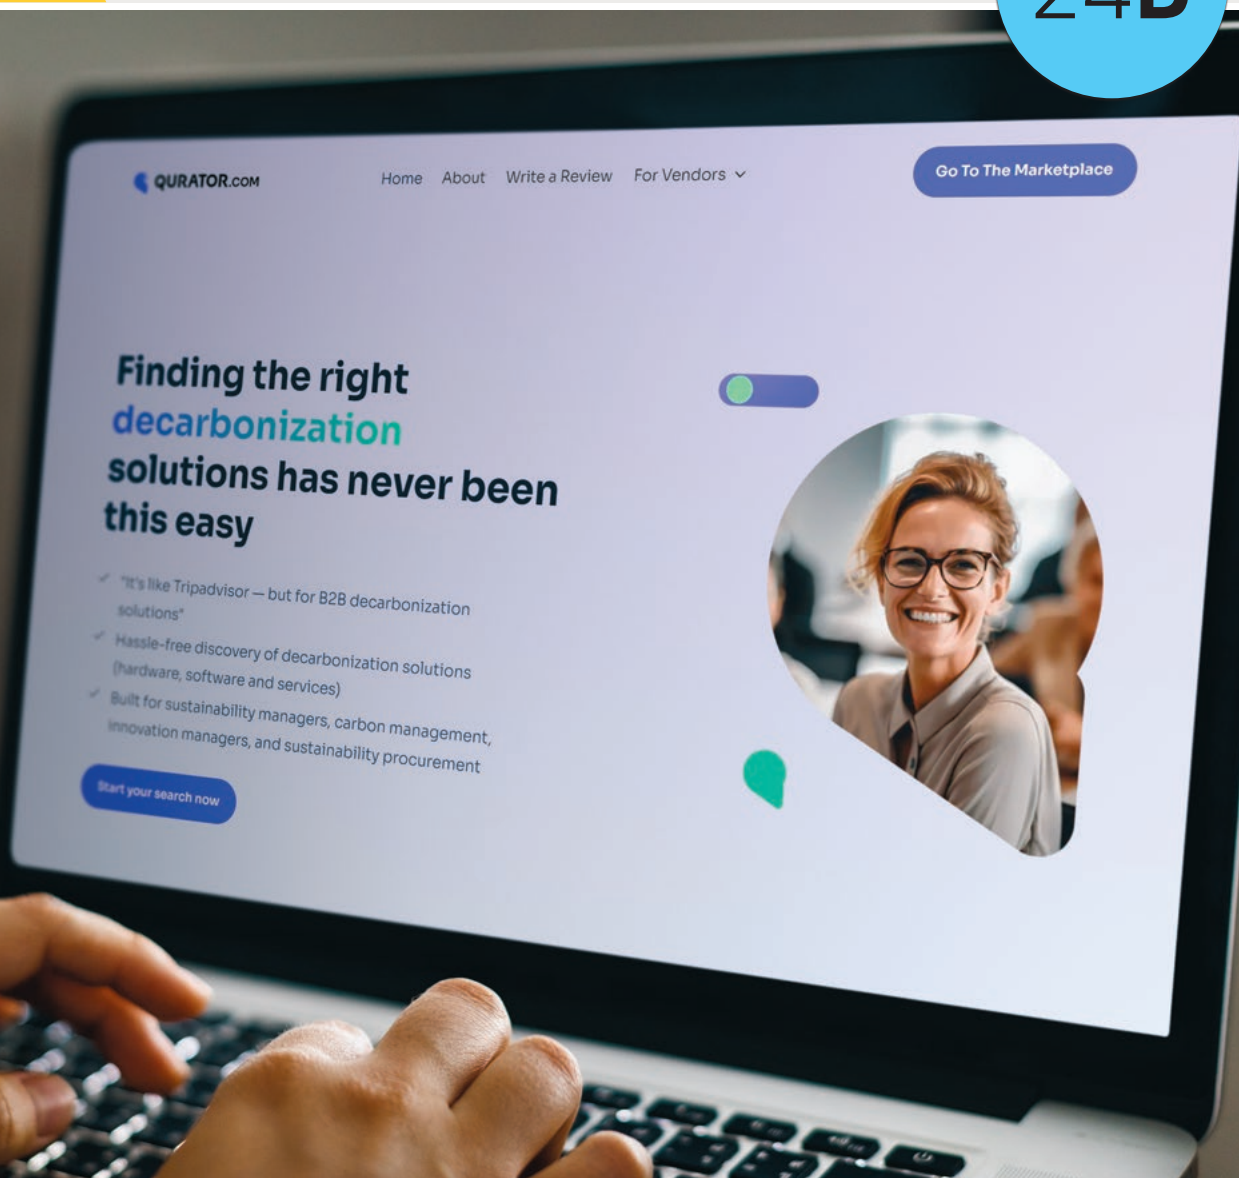

TBB.

Qurator

Qurator. Scouting platform for B2B decarbonisation technologies and services

24D

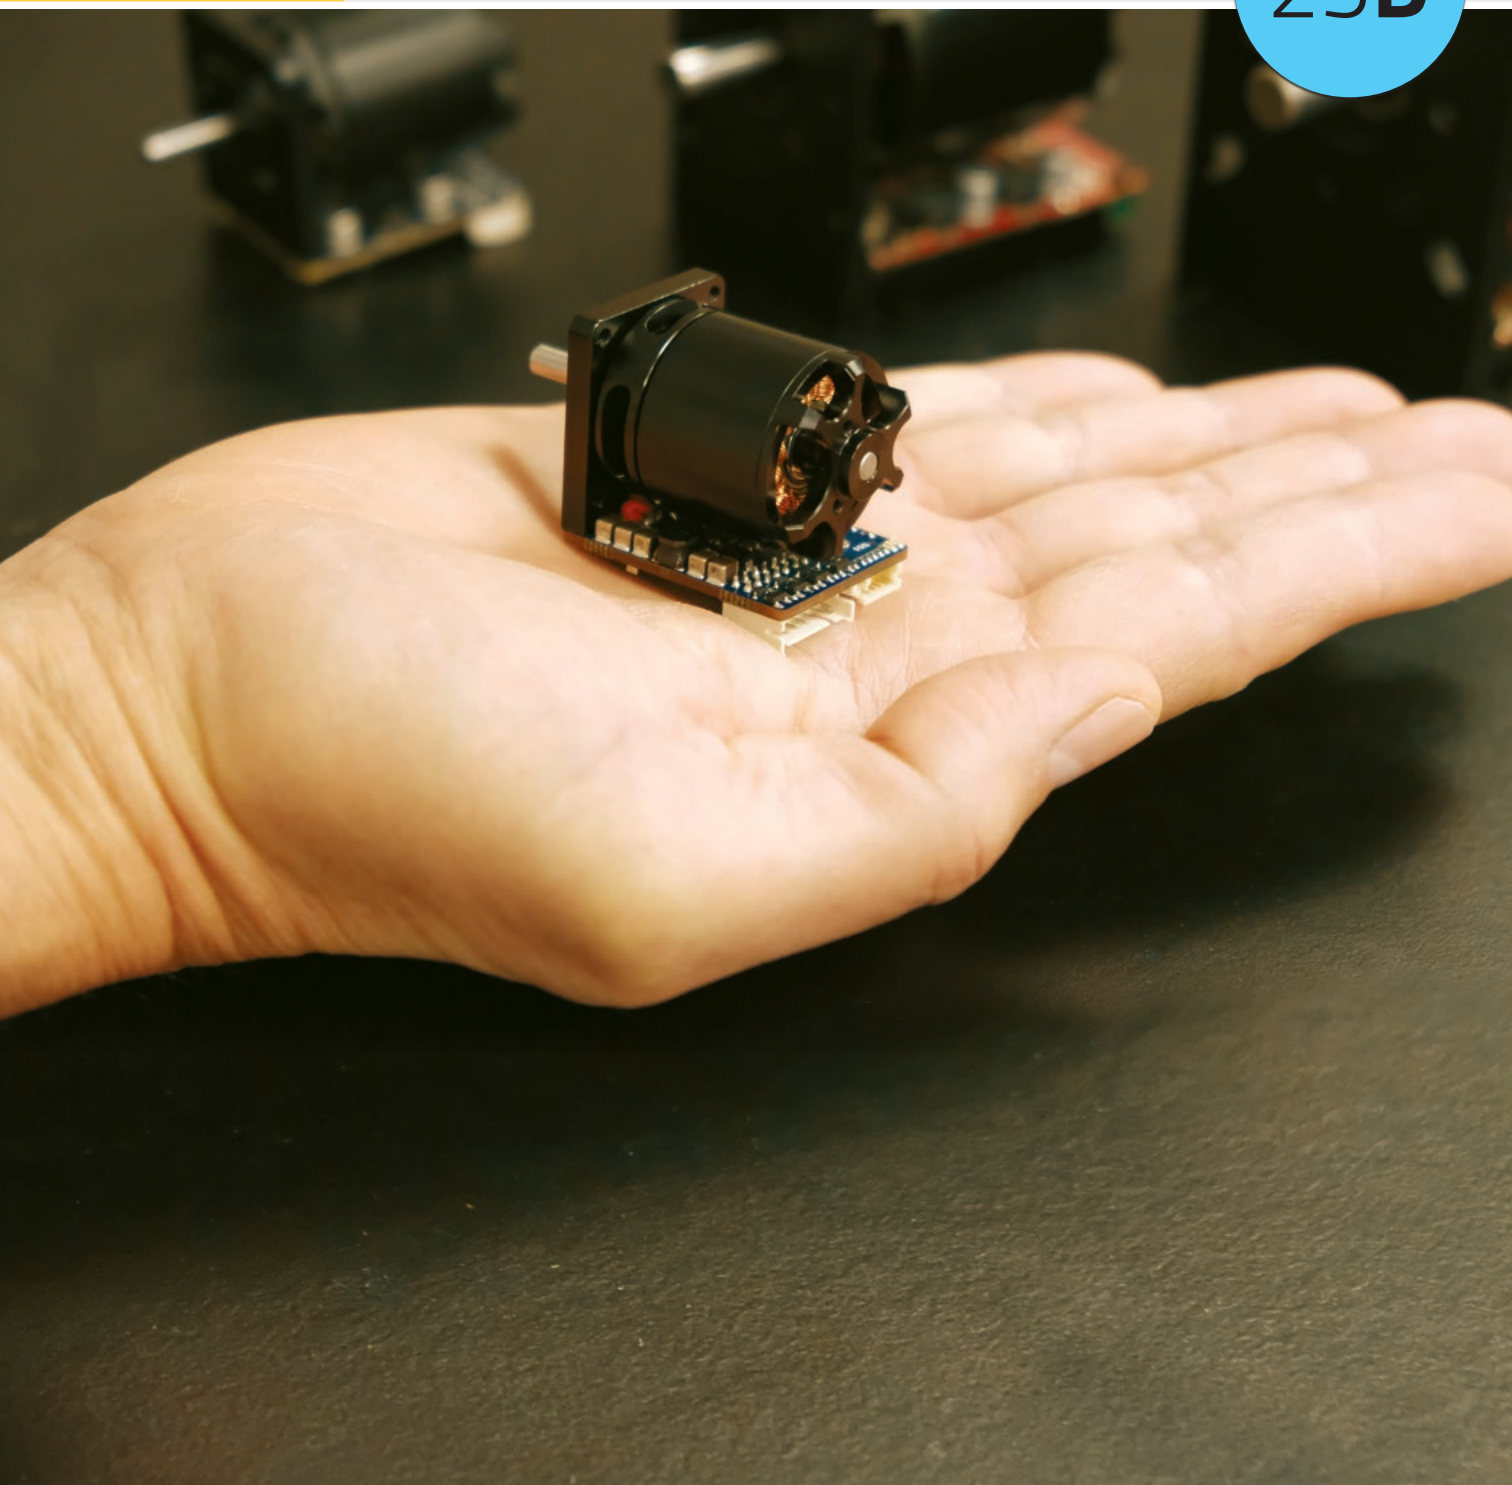

Simplex Motion

Integrated compact servomotors.

Half the weight and size, and double the torque

25D

InnoEnergy

TBB.

Stockholm Water

Fors & Ström. Smart, sustainable and customised water solutions

26D

Tribonex

Triboconditioning. Cost-efficient and scalable surface treatments for minimised friction and wear in various industrial applications

27D

**Municipality**

Candam

RecySmart. A unique cost-effective technology
to increase packaging recovery rates

**28D**

InnoEnergy

TBB.

Gradis

g.Platform. End-to-end solution covering all steps of outdoor lighting management for cities, utilities and fixture vendors

29D

Betterspace

better.energy. Intelligent room control for non-residential buildings

30D

InnoEnergy

TBB.

Non Residential building

BIN-e

Bin-e AI. The world's most advanced AI-based smart bin,
able to recognise and sort waste automatically

**31D**

Energy Floors

Energy Floors. Energy converting floor systems for high footfall areas

32D

Heliup

HELIUP Stykon®. Light and durable PV panels

33D

InnoEnergy

TBB.

Voltaro

Voltaro. The easiest way to commercial onsite solar - the digital one-stop shop connecting owners, tenants and installers

34D

iON Energy

iON-Energy Box. Generating electricity from the Earth's atmosphere

35D

OGGA

Eco Touch & Smart Building. The most viable solutions
for the intelligent energy management of housing

36D

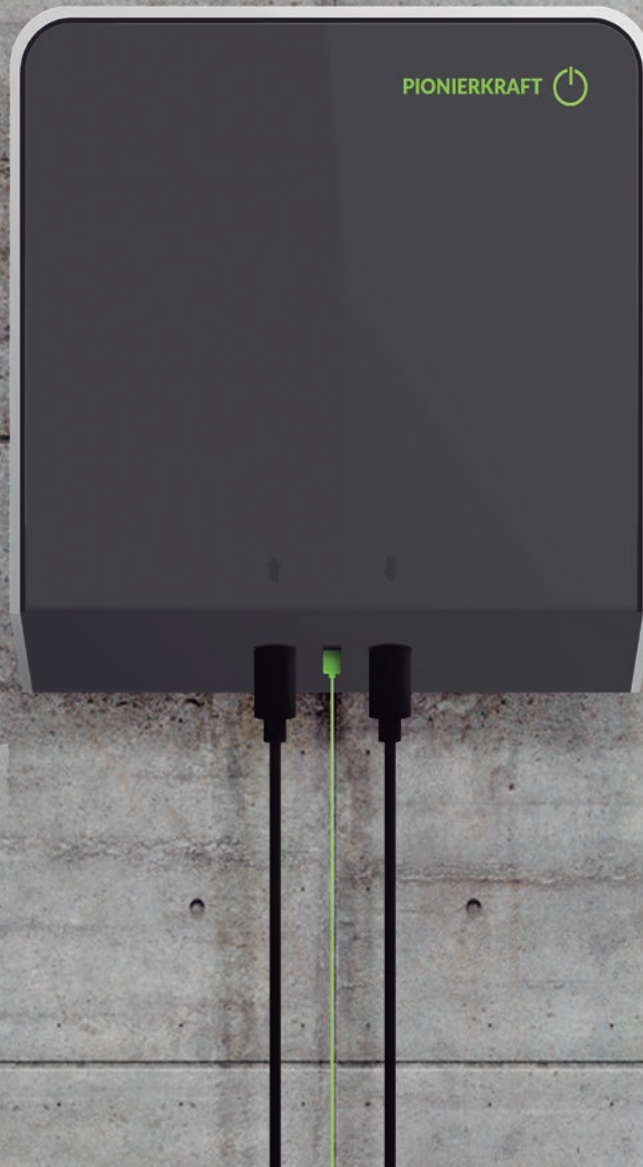

Pionierkraft

PIONIERKRAFTwerk. Full service, hardware-based photovoltaic energy sharing for small apartment buildings

37D

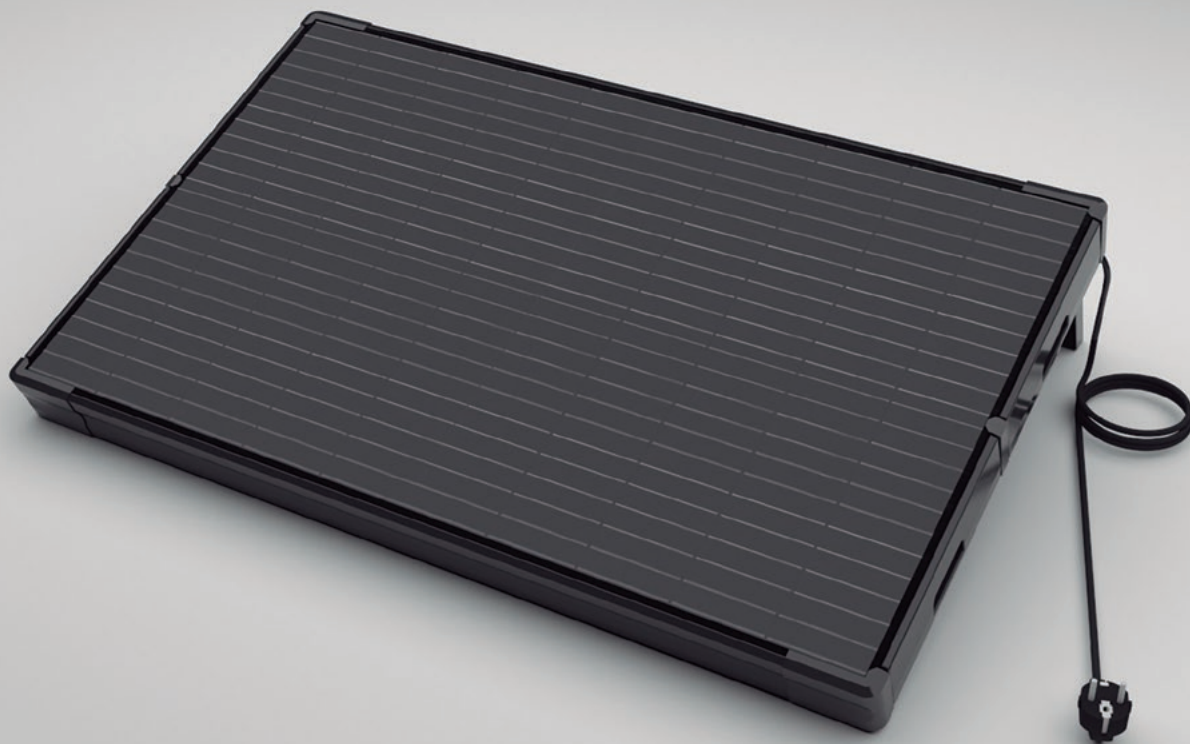

Supersola

Supersola. Plug in the sun!

38D

InnoEnergy

TBB.

Watch-e

MyEnergyBundle (Mijnenergiebundel).

Energy management on which you can build

39D

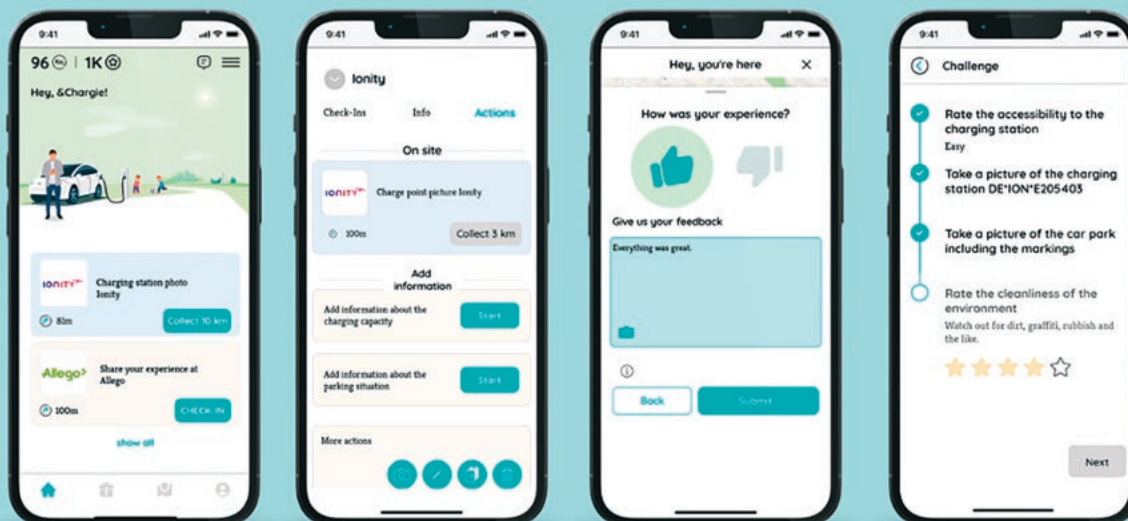

InnoEnergy

TBB.

&Charge

&Charge. Let's improve charging

40D

Coat-it

Coat-it. Nanomaterials-based coating additives that easily enhance any standard plating process

41D

eCloudCompany

eCloud PLUGO. Charge your car everywhere with a unique mobile charging station

42D

Elaphe

Elaphe Propulsion Solution. A global leader
in electric in-wheel platform technology

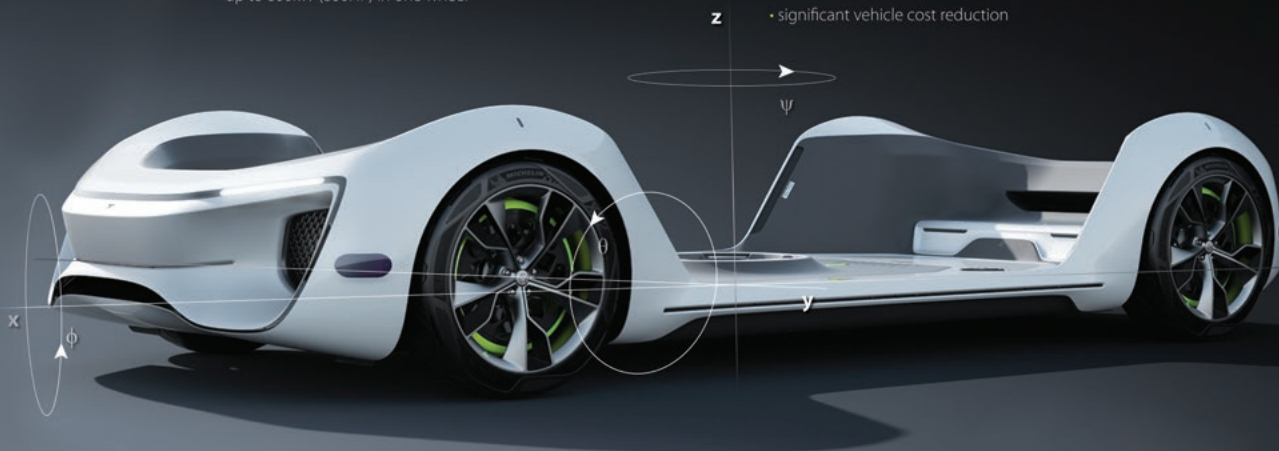

43D

Patented in-wheel direct drive technology:

- up to 600kW (800HP) in one wheel

Enabling technology for:

- better vehicle design
- less energy consumption
- significant vehicle cost reduction
- unique functionalities
- ultimate modularity

Hardt

Hardt Hyperloop. The future of transportation

44D

Incitis

H2SPEED. A green revolution in urban freight distribution

45D

Mob-Energy

EIKO, the Evolutive Cube of Power. Meets the rising demand for EV charging in parking lots with a single power supply

46D

InnoEnergy

TBB.

Navlandis

Zbox. Foldable shipping containers
that reduce transport costs and CO₂ emissions

47D

Nevomo

Nevomo. MagRail Booster technology:
an evolution of existing public and private railways

48D

Routal

Routal. Move the world smarter

49D

InnoEnergy

TBB.

Scoobic

Scoobic Hi-cargo. The ultimate way to deliver goods
in urban centres, solving last mile problems

50D

Swobbee

Swobbee. The "gas station" for e-micromobility
through battery swapping infrastructure

51D

Volytica diagnostics

vdX battery diagnostics engine. Battery diagnosis as a service

52D

Waybler

Waybler. Join the fastest slow revolution

53D

InnoEnergy

TBB.

Zeleros

Zeleros. Electrification and automation solutions
from Spanish leader in hyperloop development

54D

Zparq

Zparq. Making marine propulsion sustainable

55D
